

OpenAIRE

Open Access Infrastructure for Research in Europe

FP7 Open Access pilot

Deposit peer reviewed research articles resulting from certain FP7 projects into an online repository and make best efforts to ensure open access to these articles. Background information can be found on the portal.

ERC guidelines for Open Access

The ERC requires that all peer-reviewed publications from ERC-funded research projects be deposited on publication into an appropriate research repository where available and made Open Access within 6 months of publication.

How can you comply?

Researchers should deposit into the institutional repository of the research institution with which they are affiliated. If that is not available, in a subject repository. If no appropriate repository is available, deposit in the OpenAIRE Orphan repository.

How can OpenAIRE help you?

A network of national helpdesks is set up to answer all questions on the EC Pilot, depositing, Open Access, and other related themes. The OpenAIRE portal will be a gateway to services such as searching FP7 publications and usage statistics
