From Dempsey, Lorcan, Eric Childress et al. 2005.  
 “Metadata switch.” In *E-Scholarship: A LITA Guide*  
 (Chicago: LITA).

# Unanswered Questions

---

- Who uses the online catalog?
- Who uses library Web pages?
- For what?
- How much?
- Compared to what?
  - Compared to library e-resource discovery systems?
  - Compared to Amazoogoogle?

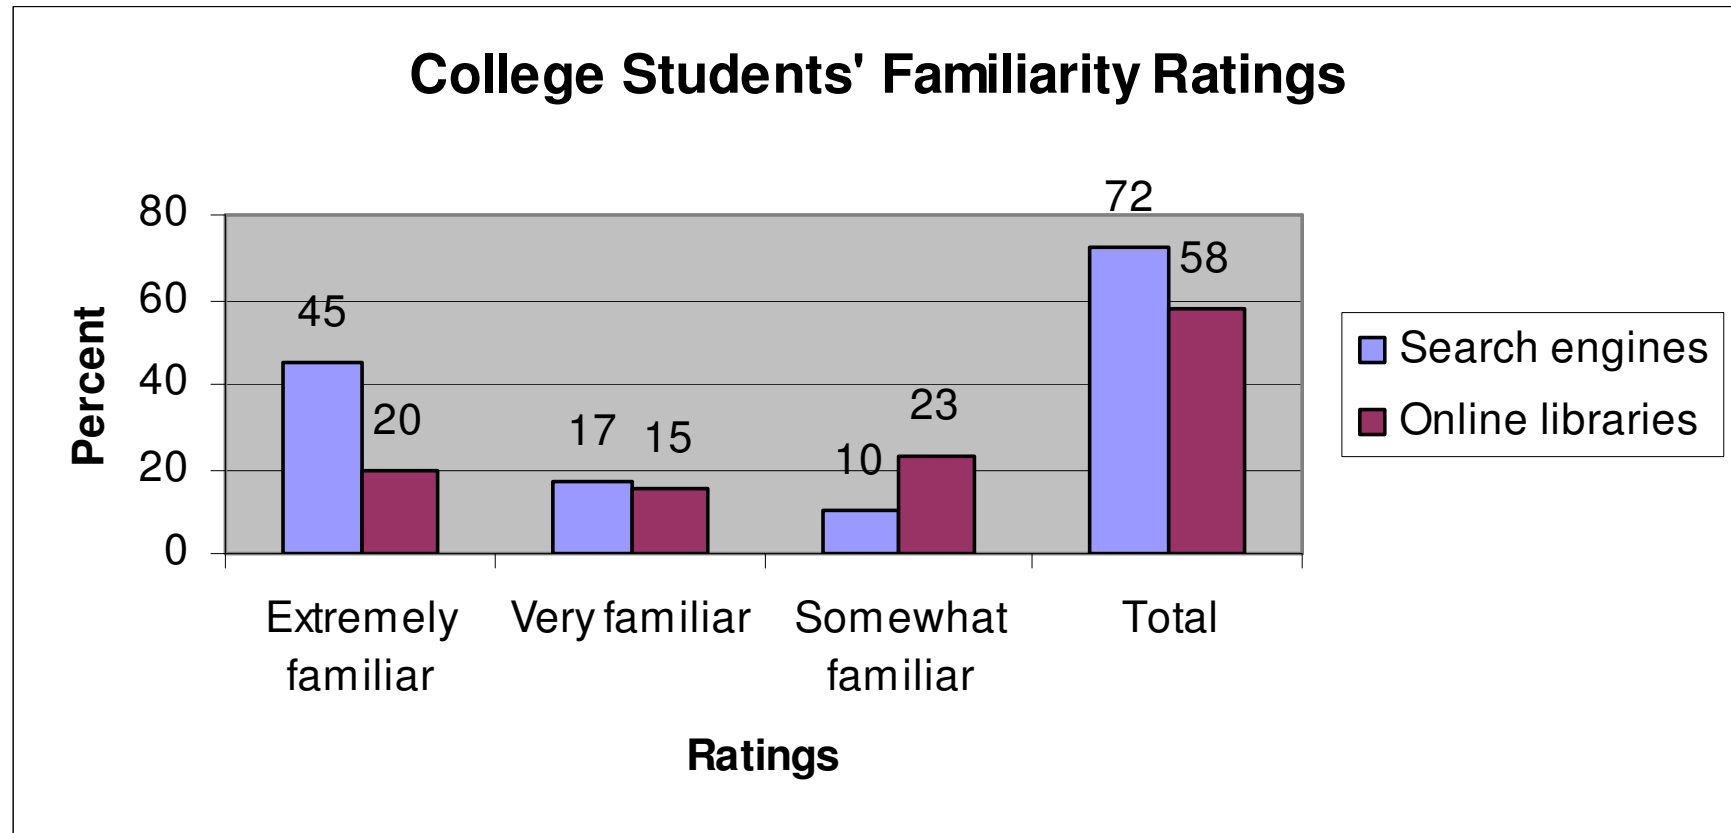

## Fundamental Shift in Preferences/Landscape for Information Organization?

---

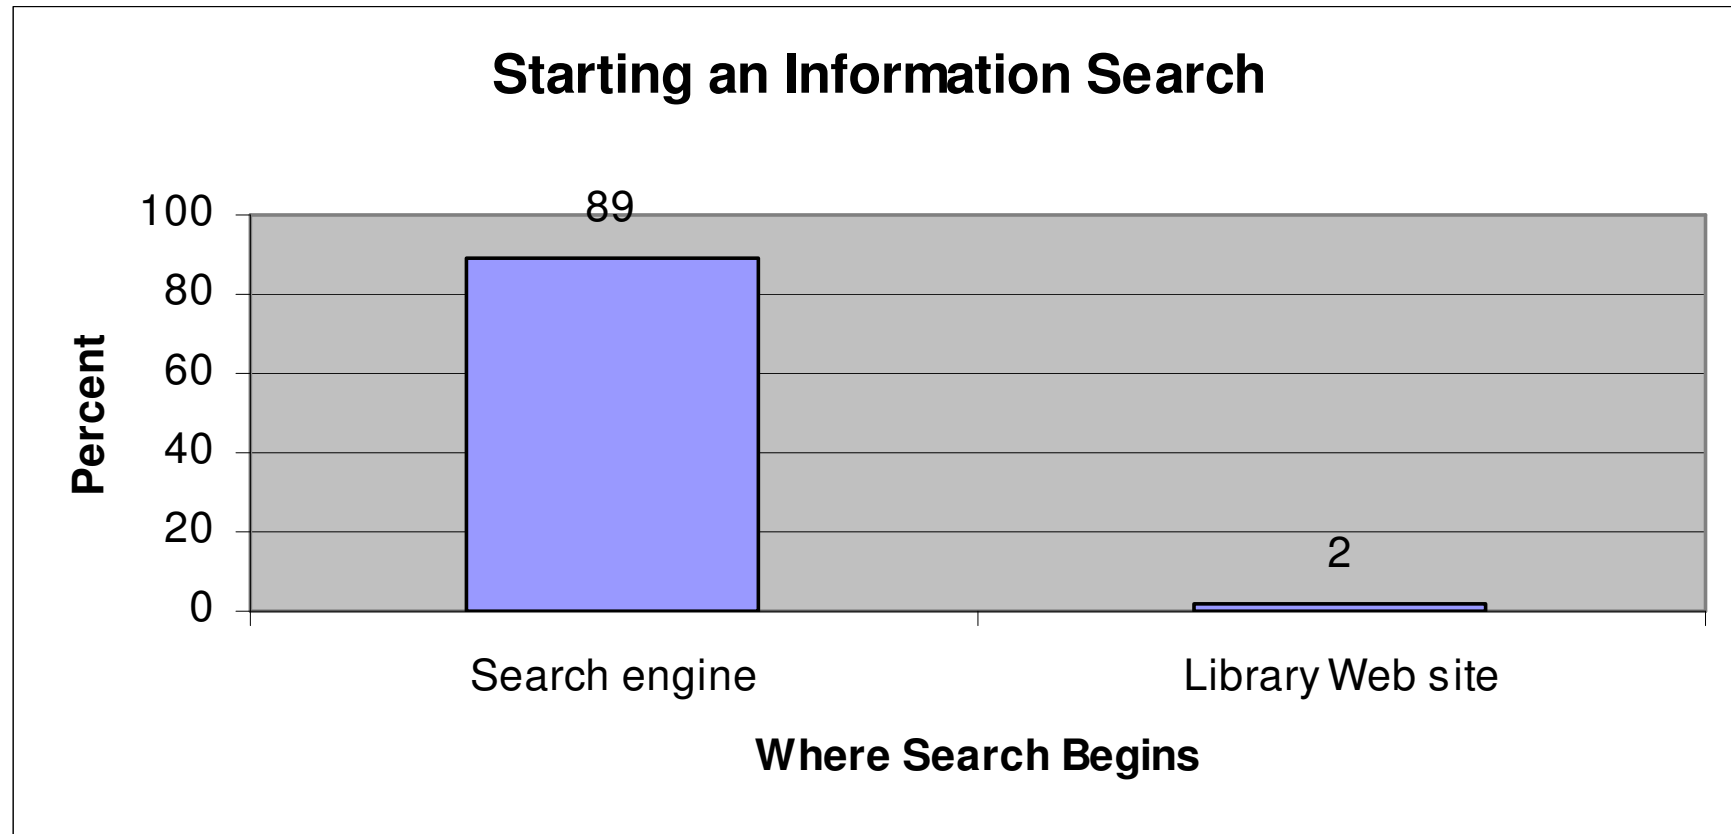

- Bibliographic tools vs. indexing and full text searching
- Are there generational differences?
- Differences based on discipline or profession?
- What about visual resources?
- What about digital data?

# Familiarity with Search Engines vs. Online Libraries

*College Students' Perceptions of Libraries and Information Resources: a Report to the OCLC Membership:* <http://www.oclc.org/reports/perceptionscollege.htm>

# Where Do You Begin a Search for Information on a Topic?

*College Students' Perceptions of Libraries and Information Resources: a Report to the OCLC Membership:* <http://www.oclc.org/reports/perceptionscollege.htm>

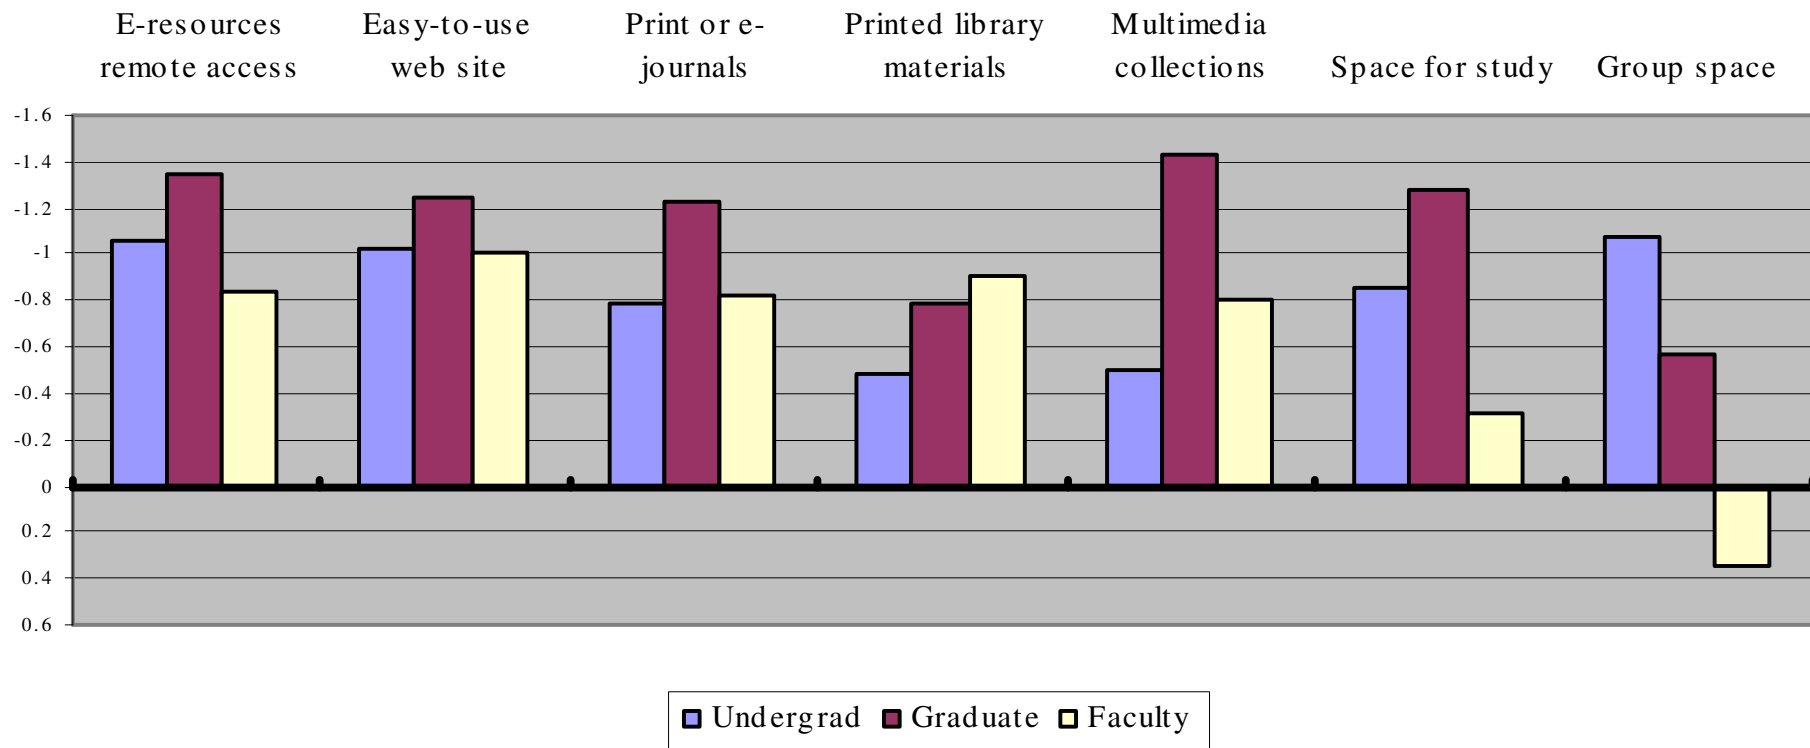

Online library

Collections

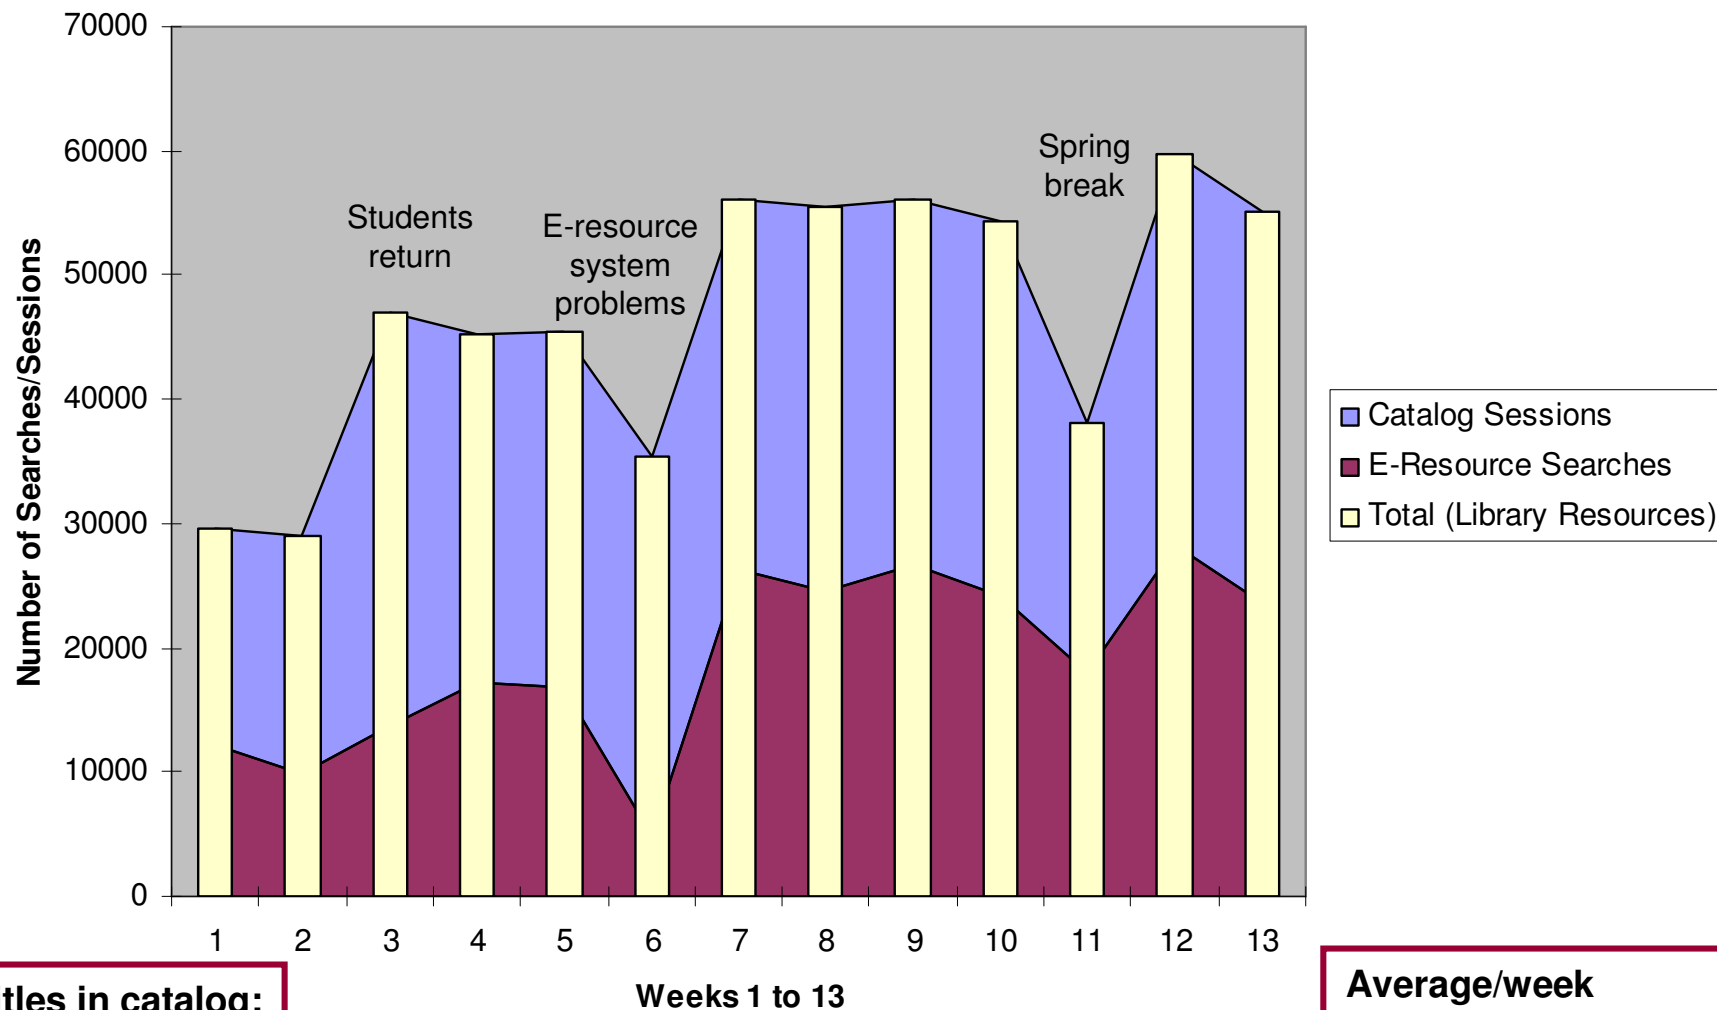

Space

Gaps in Satisfaction

*LibQUAL+ 2005 Survey: Cornell University Library.* Association of Research Libraries. <http://www.libqual.org>

## Cornell Catalog and E-Resource Searching, First Quarter 2005

**Titles in catalog:**  
**> 4 million**  
**E-resources:**  
**379 thousand**

**Average/week**  
**(Q1 2005):**  
**Google: 441 million**  
**Library: 47 thousand**

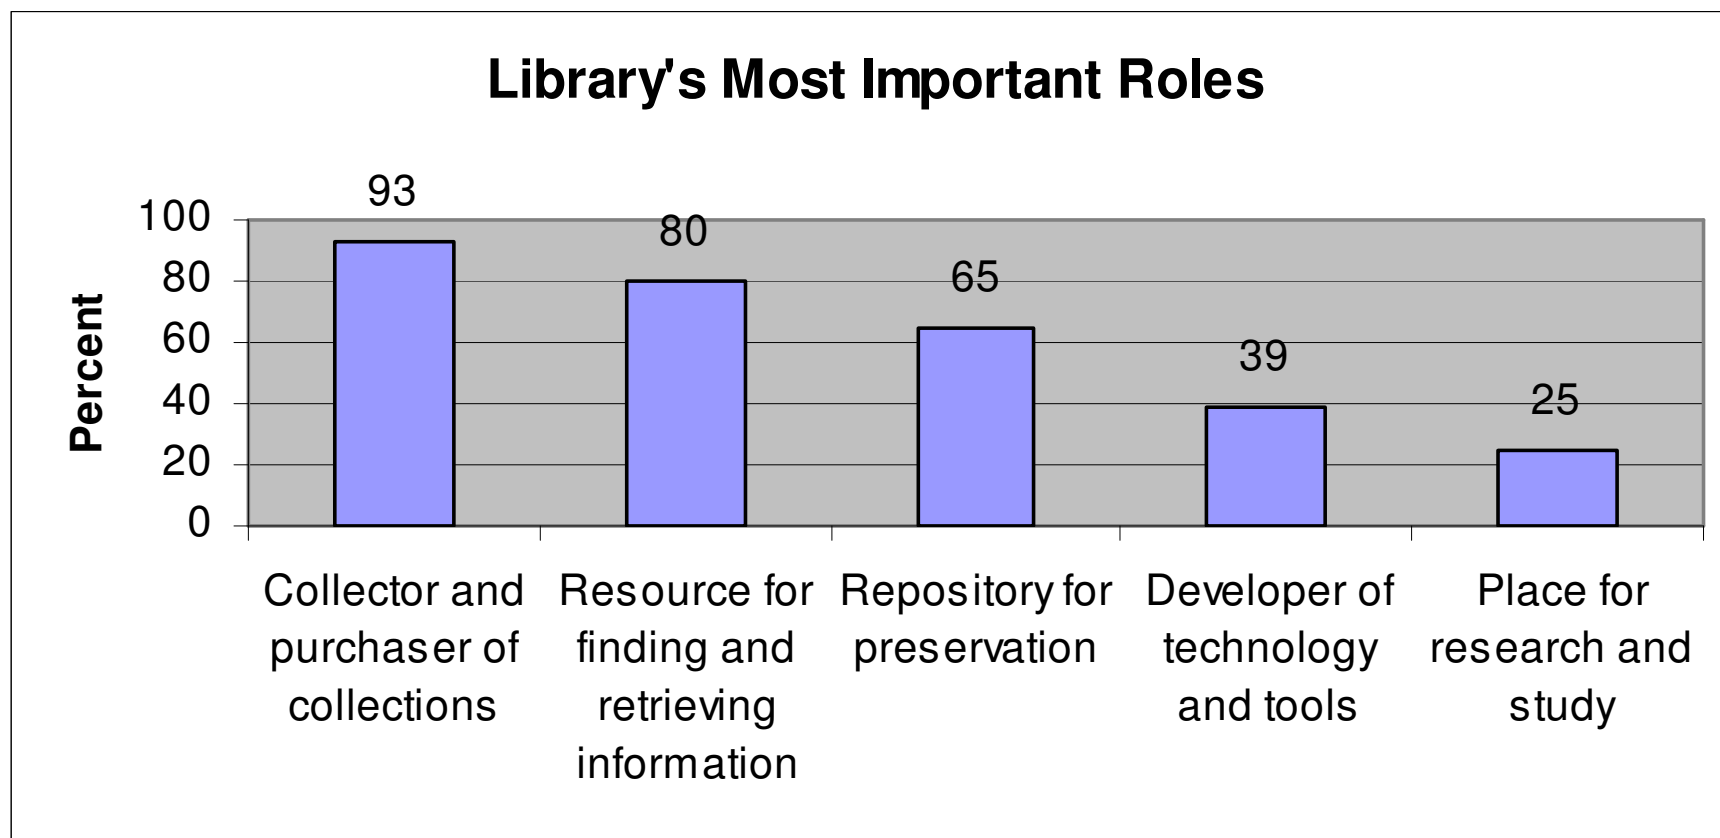

## Networked E-Resources at Cornell

---

- Less than 10% of the collection
- More than 25% of the materials budget
- About 50% of the use
- All searches from library pages = a tiny fraction of the use of search engines

# University of Minnesota Libraries: Research Needs of Humanists and Social Scientists

Available from <http://www.lib.umn.edu/about/mellon/docs.phtml>

Full report and a variety of presentations, e.g.,

Karen Williams, Charleston Conference. ["Lively Lunch: The Same...](#)

[But Different: Varying User Behavior in the Humanities and Social Sciences"](#)

# University of Minnesota Libraries

## Study: More Findings

---

- Humanities and social sciences faculty and grad students work primarily from home
- Library space remains more important to grad students than faculty members
- Employ a wide variety of research materials, esp. *primary source materials*, also including *data* and *multimedia*
- Faculty and grad students need help organizing and managing their research materials
- Library has the opportunity to play a more proactive role

# Review of Unanswered Questions

---

- Who uses the online catalog?
  - Faculty and graduate students (comparatively more)
  - Undergraduates (comparatively less)
- Who uses library Web pages? How much?
  - Strong preference for search engines
- For what?
  - Published materials (mostly monographs?)
  - Keen interest in primary source materials, data, images, multimedia—all outside the catalog

## Review of Unanswered Questions, 2

---

- Compared to what?
  - Strong use of e-resource discovery systems outside the catalog
  - Strong preference for search engines
  - Some are familiar with bibliographic data/tools, many are not (and find what they want anyway?)
  - Graduate students may be the least satisfied with how libraries are serving them

# The Way We Worked

Abstracting &  
Indexing services

# The Decline of the Catalog

---

- Users bypassing the catalog
  - 89% of college students say they begin with search engines vs 2% with library Web pages
- One piece of a fragmented library information landscape (and hard to use!)
  - Principle of Least Effort
  - Metasearch in trouble
- Cataloging tradition unsustainable
  - “Just how much do we need to continue to spend on carefully constructed catalogs?”—Deanna Marcum, LC Associate Librarian

Calhoun, Karen. *The Changing Nature of the Catalog and Its Integration with Other Discovery Tools*. Washington, DC: Library of Congress, 17 March 2006. <http://www.loc.gov/catdir/calhoun-report-final.pdf>

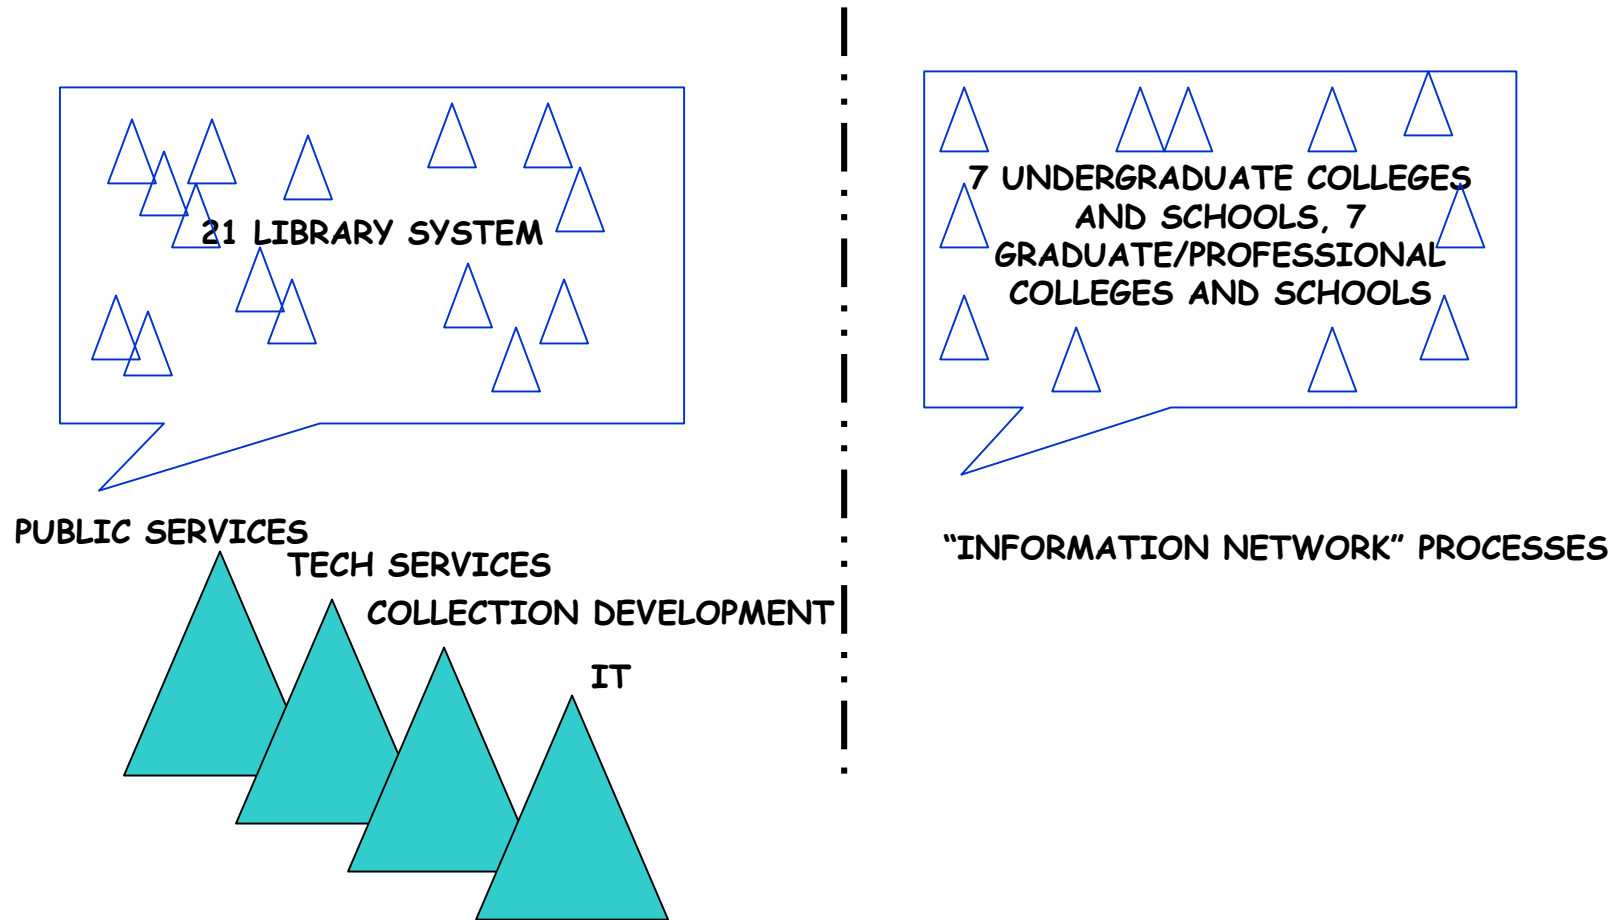

# A New Kind of Library

- Build a vision of a new kind of library
- Be more involved with research and learning materials and systems
- Be more engaged with campus communities
- Make library collections and librarians more visible
- Move to next generation systems and services

An online social network

# Information Silos

# Outreach: A BOTH/AND World

---

DATA

PEOPLE

# Next Generation Integrated Library System? --Modularity

---

- “ILSes should think in terms of linking rather than building”
- Decoupling discovery and inventory management functions
- Standards

# Toward a New Library Information Space

---

## ○ Emerging Objectives

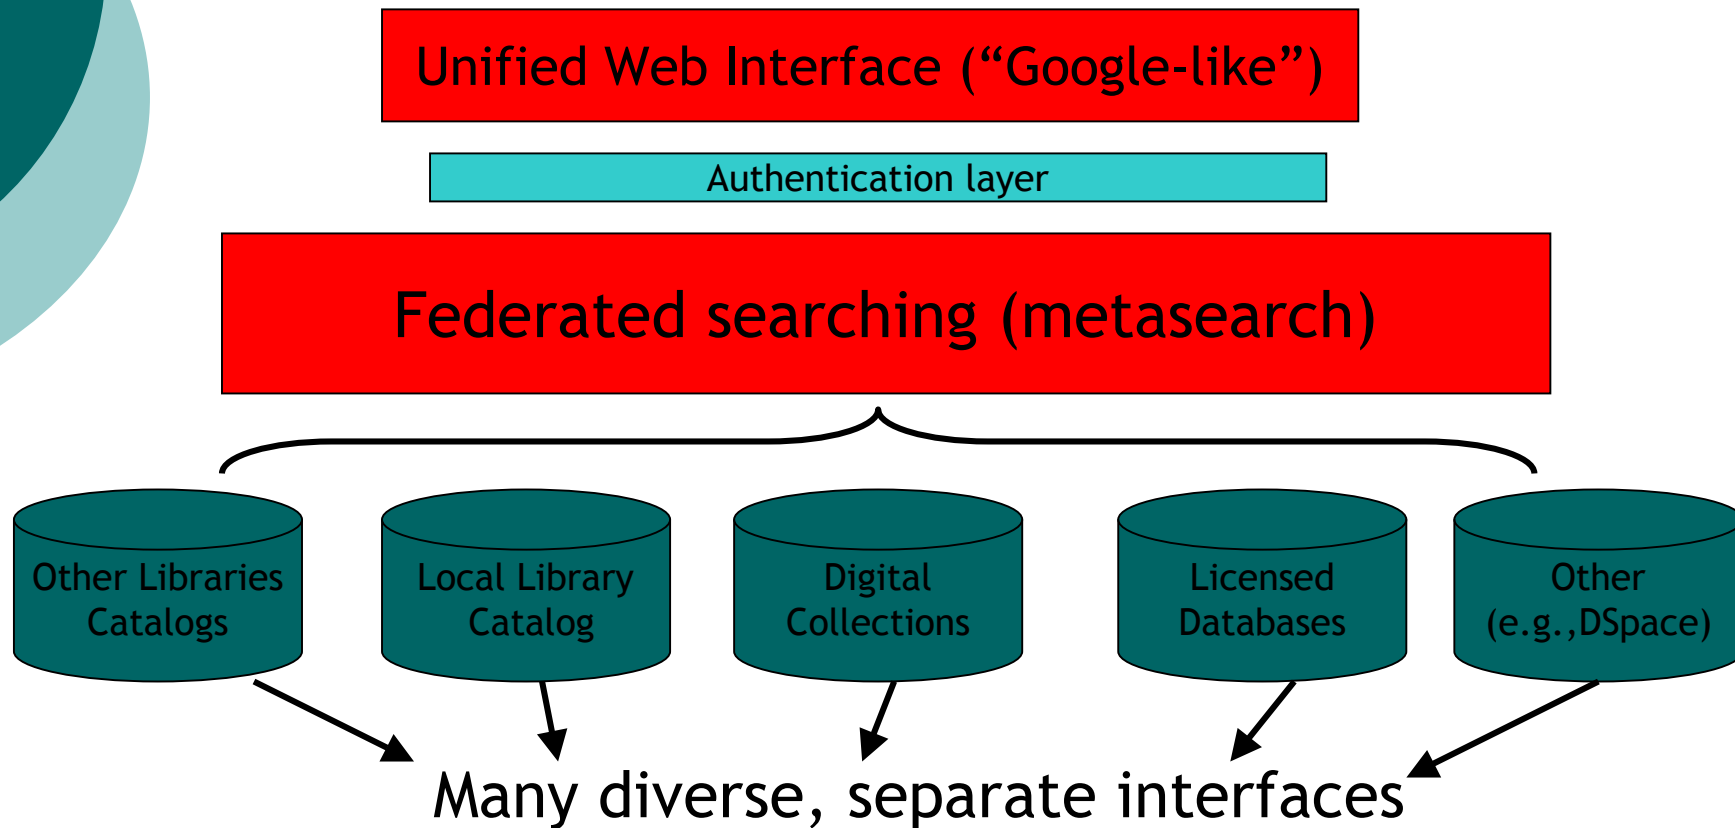

- Integrate access to *all* library resources (print, archives, digital, e-)
- Simplify digital and e-resource management (lower costs AND improve service)
- Become visible in the user's environment (i.e., **on open Web, on course pages, etc.**)

## ○ Today's Methods and Tools

- Web-accessible lists + catalogs
- Federated searching
- Reference linking (OpenURL)
- Portals
- E-resource management systems
- Digital asset management systems

# The Portal Dream, Version 1: A Unifying Local System

---

# Extending the Local Portal Dream

Done

# Outward Integration

---

“Integration should be outward rather than inward, with libraries seeking to use their components in new ways”

--Interviewee for LC report on future of the catalog

# From a Distance!

---

# Longer Term Vision

---

- Switch users from where they find things to library-managed collections of all kinds
- Local catalog one link in a chain of services, one repository managed by the library
- More coherent and comprehensive scholarly information systems, perhaps by discipline
- Infrastructure to permit global discovery and delivery of information among open, loosely-coupled systems
- Critical mass of digitized publications and special collections online
- Many starting points on the Web leading to many types of scholarly information objects

# Find It on Google,\* Get It from My Library

---

- Open WorldCat
- RedLight Green
- Google Scholar
- Google Book Search
- Google Library Project
- Million Book Project
- Open Content Alliance
- E-books
- Print on demand

**\*The word "google" was first used in the 1927 Little Rascals silent film "Dog Heaven", used to refer to a having a drink of water.**

**[en.wikipedia.org/wiki/Google \(verb\)](http://en.wikipedia.org/wiki/Google_(verb))**

## Intermediate Vision

---

- Better library interface > better user experience “fun, fast, and focused” (e.g., Primo)
- Draw on the local catalog’s strongest suit: support for inventory control and delivery
- Shared online catalogs: begin to aggregate discovery function for books, serials, and their e-counterparts
- Larger scale collaboration on collection development/resource sharing, storage, preservation

## Intermediate Vision, 2

---

- Start to build bigger scholarly information environments—with libraries playing a role—to aggregate more of the expanding universe of scholarly digital assets
- Metadata and outreach skills = strategic assets

## Intermediate Vision, 3

---

- Beginning of the era of special collections
- Aggregate discovery of digital collections
- More emphasis on visual resources

# Teaching, Learning, and Research, the Next Generation

---

Thank You!
