What is OCUL?

OCUL is a consortium of twenty-one university libraries in the province of Ontario. The member libraries cooperate to enhance information services through resource sharing, collective purchasing, document delivery and many other similar activities.

OCUL's vision is to be a recognized leader in provincial, national and international post-secondary communities for the collaborative development and delivery of outstanding and innovative library services that are critical to the success of Ontario's universities. Established in 1967, OCUL's twenty-one member institutions continue to enhance their libraries through activities such as resource sharing, collective purchasing, and, joint creation of the digital library Scholars Portal.

Problem of Collection Overlap

- OCUL Information Resources group identified overlap in coverage as a major concern for managing collections
- Concern that libraries were buying content 2 or 3 times over because of the way content is packaged
- Requested that Scholars Portal work with them to analyze the problem

What we Needed in a Tool

- Questions the tool needed to help answer:
 - New Acquisitions: How will new product x affect my current online journal collection (# new titles, # overlapping titles)?
 - Cancellations: How would cancelling product y affect my current full text journal collection? Citation coverage of my journal collection?
 - New Program/Program Review Reports: How well is my collection covering a particular discipline in terms of a core list of journal titles? How does my collection fare against comparators
 - Weeding: Which of my print journals are covered in online archives I trust for perpetual access (or other features).

SCOT - Serials Collection Overlap Tool

- Where does the data come from?
 - SFX: local full text product coverage information for each of the 21 schools.
 - Gold Rush: Database coverage information for aggregated databases and citation coverage dates. Other products not covered by SFX and consortial title lists.
 - Excel Files: CRKN products that differ from a standard publisher or vendor offering.

Technology used for SCOT

- MarkLogic server and MarkLogic database
- Documents in XML format
- Interface in Xquery
- Java Loaders – to generate reports
- XML from SFX active target portfolios then grouped by vendors and packages
- Use Gold Rush interface – call from Java program to import lists.

SCOT - Features

- Types of analyses supported
 - Journal coverage comparisons in both A&I and full text resources
(Citation and full text coverage comparisons)
 - 1 to 1, 1 to many, or many to many (up to 3 individual resources, or 3 groups of resources)
 - Upload journal ISSNs from additional sources (i.e. print holdings)
 - Overlap between local, global and/or consortially licensed or purchased resources

Serials Collection Overlap Tool

- Updating method proposed:
 - Monthly updates to SFX knowledge bases – updates SCOT.
 - Gold Rush updating method and schedule to review, but SPOT may reload all data at any desired time.
 - Consortial products updated annually where applicable
 - ‘Entitlements’ information for individual schools updated annually OR ad hoc by institutional SCOT users.
- Resources required:
 - Student time annually for updating lists.
 - Programmer time to adjust scripts and load data.
 - Gold Rush holdings service (1800/year)
- Benefits – SCOT does what no other single overlap tool can do, can include lists from any of the other tools via upload, and we can grow it to include usage, cost and other metrics.

	ADAT (Academic Database Assessment Tool) FREE	SFX Advanced Collection Tool (<i>avail</i>)	Gold Rush COST INCLUDED IN SCOT	360 SS (avail to some)	SCOT	Ulrich's Serials Analysis
Full Text comparison	YES	YES	YES	YES	YES	YES
Citation comparison	YES	NO	YES	NO	YES	YES
# of databases included	23	Approx. 450	1923 (multiple versions of same)	?	1577	Similar to Gold Rush
Upload title lists	NO	YES	Only to create a new holding	?	YES	YES
Main Limitations	Limited databases	No citation details	Clunky to use; many databases don't match OCUL holdings	Same as SFX	Requires investment	Only compare 5 databases; no local info
Distinguishing Benefit	Qualitative as well as quantitative data	Known local FT holdings	Extensive holdings lists updated frequently	Known local FT holdings	OCUL specific holdings details; future developments	Additional title context (peer review, JCR impact, subjects...)

SCOT Enhancements

- ✓ Add subjects at the title level
- ✓ Add links to ADAT where databases are covered
- ✓ Allow limiting of comparison to full text or citation
- Scripting to show start-up stats (i.e. top 10 most redundant resources, # full text journals etc.)
- Incorporation of cost and use data
- Upload from other tools (format to match tool outputs, i.e. Serials Analysis)
- Add ebooks
- [DEMO!](#)

Serials Collection Overlap Tool

 Collection Overlap Tool

Search for: in All Databases

Welcome to the OCUL Collection Overlap Tool for Electronic Journal Resources. With this tool, you can generate title lists for databases and journal packages containing full text and citation date ranges (where available).

The tool helps to identify overlapping and unique titles among databases. With it, you can compare up to 3 individual databases, or 3 different groupings of databases that you define.

All lists can be downloaded in csv format.

To view title coverage within a single package or database, click on the Database TitleList button above.

To compare databases or groups of databases, click on the Compare Titles button.

The tool contains databases from the Colorado Alliance's Goldrush system, as well as SFX targets and CRKN title lists.

The 'All Databases' list contains all of these titles.

The 'My Databases' list contains your school's CRKN and OCUL packages as well as your locally licensed resources we have identified for you using your library website.

You can customize your 'My Databases' listing using the deactivate button to remove existing databases, or the activate button to add databases not in your list.

In the Compare Titles area, you can choose to look at databases you subscribe to, those that you do not currently subscribe to, or a combination of both.

SCOT Feature - Subject Filters

The screenshot displays the SCOT (Serials Collections Overlap Tool) interface. At the top left, the logo consists of two overlapping circles (blue and orange) followed by the text "Serials Collections Overlap Tool". To the right of the logo is a search bar with the text "Search for: ISSN" and a search icon. Further right are links for "All Databases", "TitleList", "Compare", and "Log out".

Below the search bar is a navigation menu with three tabs: "Select Products", "Select/Create Package" (which is active), and "Saved Comparisons".

The main content area is titled "Options" and contains several sections:

- Package Selection:** Two radio buttons are present: "Package" (selected) and "Uploaded Files".
- School:** A dropdown menu with "algoma" selected.
- Package Name:** A dropdown menu with "ALL_MY_HOLDINGS_Package" selected.
- Subject Filter:** A checked checkbox. Below it, "Filter By:" has two radio buttons: "Gold Rush Subjects" and "SFX Subjects" (selected). Under "SFX Subjects", there is a dropdown menu with "a" selected. A list of sub-subjects is shown below the dropdown: "Agriculture Sciences" and "Arts and Humanities".
- Coverage Filter:** A checked checkbox. Below it, "Filter By:" has three radio buttons: "All" (selected), "Fulltext Only", and "Citation Only".

At the bottom right of the options panel is a green "Add" button with a plus sign icon. A pagination bar at the bottom of the subject filter section shows "Page 1 of 1" with navigation arrows.

Database Information

Database Name :
ABI/INFORM Complete

Type :
Full Text/Citation

Description :
One of the world's first electronic databases, ABI/INFORM has been a premier source of business information for more than thirty years. Now a complementary database--ABI/INFORM Archive--can provide digital images of every page from every issue of leading business journals. Some of the publications date back to the early decades of the 20th century.

Database Information

Database Name :
ABI/INFORM Complete

Type :
Full Text/Citation

Description :
One of the world's first electronic databases, ABI/INFORM has been a premier source of business information for more than thirty years. Now a complementary database--ABI/INFORM Archive--can provide digital images every page from every issue of leading business journals. Some of the publications date back to the early decades of the 20th century.
