Feedback from Users
User Feedback

“I am doing a literature review on global supply chains. I retrieve thousands of results, including Wikipedia. How can I access peer-review journals only?” The A to Z list is confusing….

“I am drafting a Governing Body document. I need to find an old document from 1929 on forced labour. I can’t sort results by date-oldest”.

“I am searching about the 1st Maritime Preparatory Meeting in 1936. I get thousands of records. Why? I just need the report of the first meeting. Why is it so difficult to find it?”
