

Day 1 - Cloud Apps and the Alma Open Platform

Question	Answer(s)
What is the recommended way to get have specific data elements available for update through APIs? Other than SFCs, that are rejected with reference to ideas exchange? (e.g., resource sharing requests updates)	You can post to the Developer Network Forum (https://developers.exlibrisgroup.com/forum/) as our team regularly monitors the posts there. They can offer feedback as to whether certain data elements are missing and if so the plan for getting them added.
