

<b>Day 2 - Primo Working Group Business Meeting</b>	
<b>Question</b>	<b>Answer(s)</b>
<p>on MARC norm rule task force: is UNIMARC also included? It would be very important for those who use Primo VE and UNIMARC to have specific support on norm rules</p>	<p>This was answered live, but must not have been marked as such.</p>
<p>We make our institutional publications searchabele in Primo. This results in many duplicates between those external data (not Alma) and CDI. Will the new configuration options as a result from the NERS voting be a solution for this ?</p>	<p>The discussions of scoped solutions are ongoing, but this scenario will be forwarded to Ex Libris Product Management.</p>
<p>There is a huge issue with health related searches that you are not able to limit to review-articles any more</p>	<p>The context of the question is not fully clear, but if related to CDI, there is no change to the single 'Articles' facet, with this being a single facet on PCI and remaining a single facet on CDI. See <a href="https://knowledge.exlibrisgroup.com/Primo/Content_Corner/Central_Discovery_Index/Documentation_and_Training/010CDI_-_The_Central_Discovery_Index/070Resource_Types_in_CDI">https://knowledge.exlibrisgroup.com/Primo/Content_Corner/Central_Discovery_Index/Documentation_and_Training/010CDI_-_The_Central_Discovery_Index/070Resource_Types_in_CDI</a>. If the query is another issue being experienced locally, then a Salesforce case is recommended.</p>
