

## **François Renaville – Statement of Interest**

Dear IGeLU Secretariat,

I have the honor to transmit herewith my candidacy for the IGeLU Steering Committee.

I have been working at the University of Liège Library (Belgium) for more than 20 years and I'm currently head of the library systems. We have been using Ex Libris solutions since 2006 and I'm an administrator of Alma, Primo VE, Library Mobile and RapidILL. For some years now, I have given the IGeLU SC a hand in organizing the Annual Conference. Previously, I also had the opportunity to coordinate the SFX Knowledge Base Advisory Board (KBAB) and the Content Working Group (CWG) for IGeLU. Among other things, I would make it a priority for my work in the SC to focus on quality and successful services in Ex Libris products for the benefit of the end users, to keep an eye on data quality in the KBs and index, to ensure that Ex Libris supports the regional and national data protection and accessibility standards and expectations and to continue helping in the organization of the conferences.

Kind regards,

François Renaville
