File Type Holdings Mapping

Mapping is a process to update collection information in bulk, including: lendable status, branch name and location name.

This process should only be done **after** new holdings have been uploaded successfully. Before downloading a list of collections below, verify your holdings have been indexed using the [Holding Status](#) page. This can take up to 24 hours after upload.

Step 1: Download a list of your collections.
[Download collections](#)

Step 2: **Lendable status mapping (block/lend):** Map one of the following lendable status to each of the collections under the column *Lendable Status*: localonly, lendablecountry, lendableinternational
Branch mapping: Map the correct branch to each collection under the column *Branch*.
Location name mapping: Map the location name you would like to see on lending slip under the column *Lending Name*.

RapidILL

Supporting Ukrainian libraries

Ex Libris, a Clarivate company, is launching a new initiative to support Ukraine in these difficult times. Ex Libris will be offering all Ukrainian libraries free use of the RapidILL interlibrary loan system in order to help support the academic community in Ukraine.

RapidILL will provide Ukrainian libraries with fast and easy access to the collections of a global community numbering more than 500 libraries.

Free usage of Rapid previously helped many libraries function during COVID as we launched a similar initiative. With many libraries and students unable to reach their buildings; RapidILL allowed librarians and students to access materials remotely.

By completing this form, you agree to comply with the relevant copyright laws and/or guidelines applicable to interlibrary loans.
