### NU LibGuides Ingest Procedure

- Northwestern University's "LibGuides in Primo" has two features we wanted to highlight.

First, the LibGuides detail record (shown in the DETAIL tab) contains the name of the LibGuide's system maintainer.

Thus, anyone with a question about a particular LibGuide knows who the librarian is in order to ask questions.

Second, that the LibGuide be viewable within the VIEW ONLINE tab.

Attached to this bog entry is our procedure for ingesting LibGuides.

For the procedure for ID, click [here](#) (from the link)

# Guide-Level DC

# Data Exports

[XML](#)[Guide HTML](#)[OAI-PMH](#)

Harvest and add LibGuides metadata to your third-party application using the OAI-PMH protocol. For more information on OAI-PMH, see <http://www.openarchives.org/OAI/2.0/openarchivesprotocol.htm>.

Your base OAI-PMH URL is:

```
http://springylib.libguides.com/oai.php
```

LibGuides supports the standard oai\_dc metadata format. Use your base URL (shown above) along with the 6 standard OAI-PMH requests to retrieve metadata from your published LibGuides in XML format. Here are a few example requests:

URL	Description
<pre>http://springylib.libguides.com/oai.php</pre>	Base URL for OAI-PMH repository
<pre>http://springylib.libguides.com/oai.php?verb=Identify</pre>	Display information about this repository
<pre>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc</pre>	Display all records in the oai_dc metadata format
<pre>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=guides</pre>	Display all guides in the oai_dc metadata format
<pre>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=az</pre>	Display all A-Z records in the oai_dc metadata format
<pre>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=er_courses</pre>	Display all ER Courses in the oai_dc metadata format (E-Reserves module required)

Want to add more DC fields for your guides? Add any of the supported elements to your guides using Guide Custom Metadata (LibGuides CMS only). See <http://dublincore.org/documents/dces/> for supported elements. Only elements in the dc.element format are supported, and metadata must be public to appear in the feed. Metadata can be imported in bulk at Admin > Metadata & URLs.

Requested by (LibCRM)

Dublin Core

Custom Metadata

Assigning metadata to a guide can help identify the guide internally or when integrating with an external website. Check the "Public" box to make the name/value pair available to search engines and other data harvesting services.

ID	Name	Value	Public?	Actions

## Add Custom DC Fields

Add metadata for guides, E-Reserves courses, and/or subjects, e (Blackboard, Canvas, Desire2Learn, Moodle, Sakai, etc.) through i subject) may have multiple metadata items associated with it.

Need to update your metadata? Use the Export All Records > TEMPLATE option to export all of your metadata in the appropriate CSV format. Make changes / additions, save (as CSV), and use the Import tool to update! (Import/Update *does not* delete metadata items. Items must be deleted individually.)

ABOUT THE TOPIC

Psychology

The foundations of consumer psychology in a broad historical sense can be traced back to the rapid industrial growth witnessed in the latter part of the nineteenth century in the United States, where the productivity that characterized the new industrial age enabled the expansion of consumerism on an unprecedented scale. With such growth in the range and availability of consumer...

# What About Tools Other Than LibGuides?

## Data Exports

XML

Guide HTML

OAI-PMH

Harvest and add LibGuides metadata to your third-party application using the OAI-PMH protocol. For more information on OAI-PMH, see <http://www.openarchives.org/OAI/faq.html>.

Your base OAI-PMH URL is:

`http://springylib.libguides.com/oai.php`

LibGuides supports the standard oai\_dc metadata format. Use your base URL (shown above) along with the 6 standard OAI-PMH requests to retrieve metadata from your published LibGuides in XML format. Here are a few example requests:

URL	Description
<code>http://springylib.libguides.com/oai.php</code>	Base URL for OAI-PMH repository
<code>http://springylib.libguides.com/oai.php?verb=Identify</code>	Display information about this repository
<code>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc</code>	Display all records in the oai_dc metadata format
<code>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=guides</code>	Display all guides in the oai_dc metadata format
<code>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=az</code>	Display all A-Z records in the oai_dc metadata format
<code>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=er_courses</code>	Display all ER Courses in the oai_dc metadata format (E-Reserves module required)

Want to add more DC fields for your guides? Add any of the supported elements to your guides using Guide Custom Metadata (LibGuides CMS only). See <http://dublincore.org/documents/dces/> for supported elements. Only elements in the dc.element format are supported, and metadata must be public to appear in the feed. Metadata can be imported in bulk at Admin > Metadata & URLs.

Metadata

Assigning metadata to a course can help identify the course internally or when integrating with an external website. Check the "Public" box to make the name/value pair available to search engines and other data harvesting services.

ID	Name	Value	Public?	Actions
81988	<a href="#">dc.type</a>	<a href="#">Course Readings</a>	<input type="checkbox"/>	<a href="#">Delete</a>

OAI-PMH

# Using LibGuides A-Z List?

Harvest and add LibGuides metadata to your third-party application using the OAI-PMH protocol. For more information on OAI-PMH, see <http://www.openarchives.org/OAI/2.0/openarchivesprotocol.htm>.

Your base OAI-PMH URL is:

```
http://springylib.libguides.com/oai.php
```

LibGuides supports the standard oai\_dc metadata format. Use your base URL (shown above) along with the 6 standard OAI-PMH requests to retrieve metadata from your published LibGuides in XML format. Here are a few example requests:

URL	Description
<pre>http://springylib.libguides.com/oai.php</pre>	Base URL for OAI-PMH repository
<pre>http://springylib.libguides.com/oai.php?verb=Identify</pre>	Display information about this repository
<pre>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc</pre>	Display all records in the oai_dc metadata format
<pre>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=guides</pre>	Display all guides in the oai_dc metadata format
<pre>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=az</pre>	Display all A-Z records in the oai_dc metadata format
<pre>http://springylib.libguides.com/oai.php?verb=ListRecords&amp;metadataPrefix=oai_dc&amp;set=er_courses</pre>	Display all ER Courses in the oai_dc metadata format (E-Reserves module required)

Want to add more DC fields for your guides? Add any of the supported elements to your guides using Guide Custom Metadata (LibGuides CMS only). See <http://dublincore.org/documents/dces/> for supported elements. Only elements in the dc.element format are supported, and metadata must be public to appear in the feed. Metadata can be imported in bulk at Admin > Metadata & URLs.

## Email Campaign Type

Marketing

Keep your subscribers informed, develop relationships, and increase engagement by tailoring your marketing messages to your audience. Use this type if your email is promoting products, services, or any other form of marketing content. This type of email must adhere to the rules of the [CAN-SPAM Act](#).

Examples: Announcements, Newsletters, Product & Services Offers/News, Events, Re-Engagement Emails, Tutorials & Tips.

Operational

Communicate critical information to your audience. Use this type if your email communicates important policy information including changes to building hours, upcoming product or service updates with downtime, etc. Operational emails should not include marketing content and can be sent to your entire audience, even if they're opted-out or chose to unsubscribe.

Examples: Announcements of System Maintenance/Downtimes/Event Cancellations, Internal/Personal Communication, Feedback Requests & Customer Service Updates.
