

Dangelu report to Igelu 2023

The Danish Ex Libris user group meets regularly twice per year and after a period with decreasing attendance, the attendance has increased again. This is partly caused by more libraries switching to Alma, including 5 libraries that go live late September 2023.

Most of the participating libraries are part of the KBDK consortium, but Dangelu also has several Alma libraries outside of this consortium.

As a new activity since last year, we have created a National User Group sub-site at Igelus web site. This has mainly been created to keep a fixed link that we can refer potential participants and other interested parties to tell them about the existence of Dangelu.

1. September 2023
