Agenda

- What is Sinopia?
 - BIBFRAME and Sinopia
- Creating a *Sinopia Stage* account
- Navigating the *Sinopia Stage* interface
- Sinopia templates
- Demonstration (editing a resource description in *Sinopia Stage*)
 - Marc export feature
- Q&A

What is Sinopia?

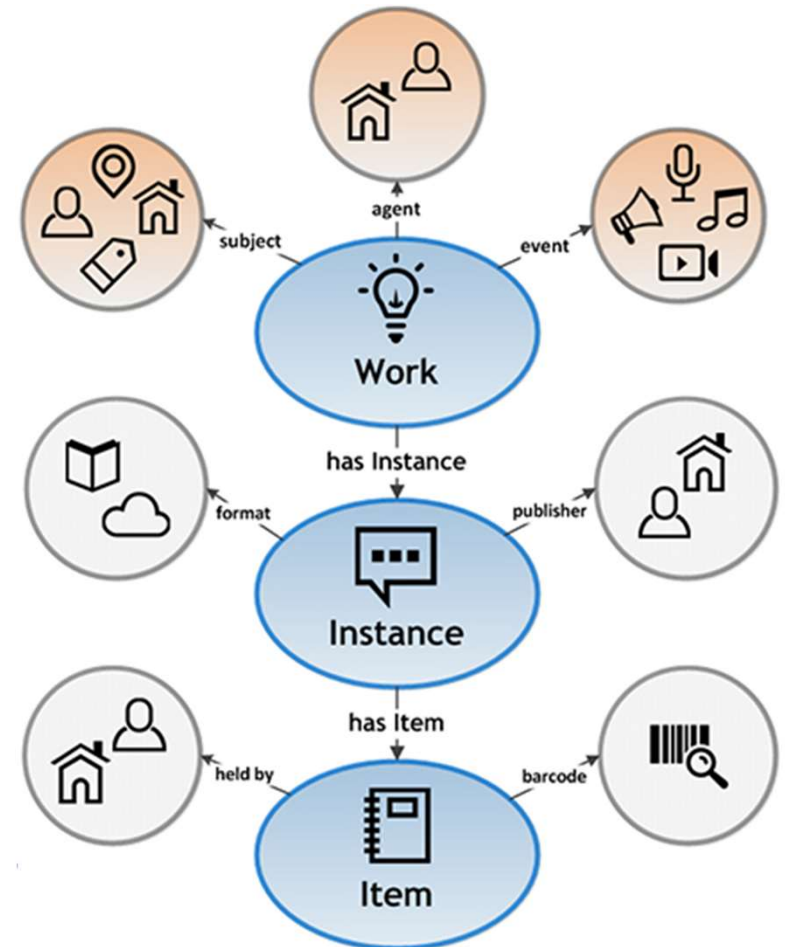

- Sinopia is linked data editor.
- Sinopia was created to enable catalogers to
 - **catalog in a linked data environment** without having to set up and maintain tools locally. Sinopia tool is Web-Based.
 - explore cooperative cataloging in a linked data environment
 - catalog using the BIBFRAME data model.

BIBFRAME and Sinopia

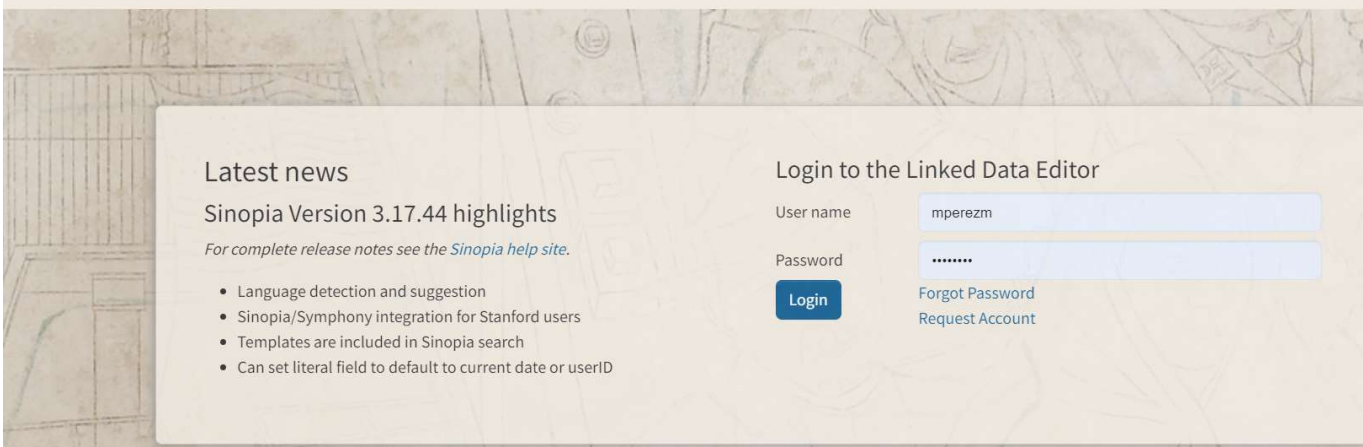

- **Work:** The highest level of abstraction, a Work, in the BIBFRAME context, reflects the conceptual essence of the cataloged resource: **authors, languages, and what it is about (subjects).**
- **Instance:** A Work may have one or more individual, material embodiments, for example, a particular published form. These are Instances of the Work. An Instance reflects information such as **its publisher, place and date of publication, and format**
- **Item:** An item is an actual copy (physical or electronic) of an Instance. It reflects information such as its **location (physical or virtual), call number, shelf mark, and barcode.**

BIBFRAME model core levels of abstraction

Sinopia Stage: stage.sinopia.io

SINOPIA - STAGE

The screenshot shows the Sinopia Stage website interface. On the left, there is a 'Latest news' section titled 'Sinopia Version 3.17.44 highlights' with a link to the help site and a list of features. On the right, there is a 'Login to the Linked Data Editor' form with fields for 'User name' (containing 'mperezm') and 'Password' (containing '.....'). Below the password field are links for 'Forgot Password' and 'Request Account', and a blue 'Login' button.

Latest news

Sinopia Version 3.17.44 highlights

For complete release notes see the [Sinopia help site](#).

- Language detection and suggestion
- Sinopia/Symphony integration for Stanford users
- Templates are included in Sinopia search
- Can set literal field to default to current date or userID

Login to the Linked Data Editor
