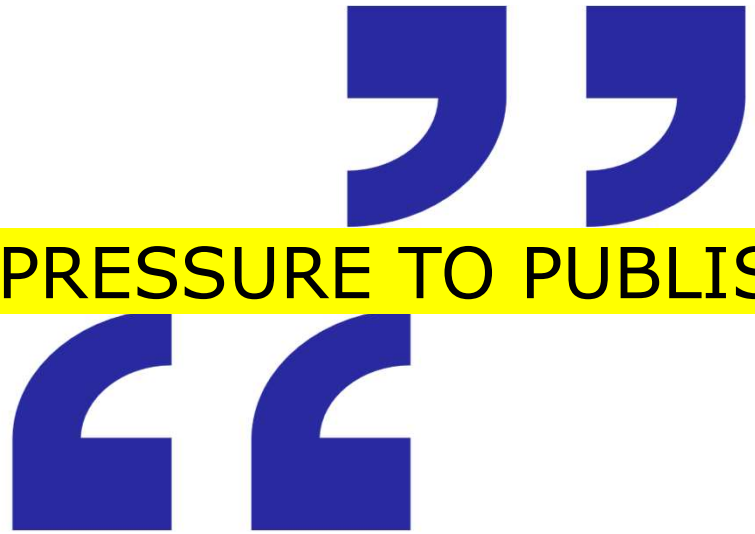
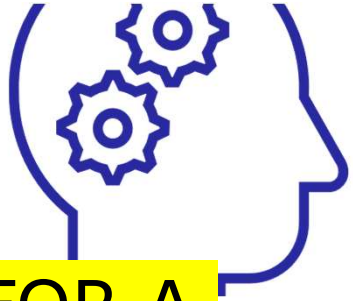
The context

LIBRARY PUBLISHING



PRESSURE TO PUBLISH

OPEN SCIENCE



NEED FOR A NEW LITERACY

INTEROPERABILITY

FUNDING

unibz

- 1997 year of foundation
- Doctorate granting University
- 4 campuses, 5 schools, 6 research centers
- 4 teaching languages
- 4000 students [10% international]
- 400 researchers [31% international]
- Top positions in rankings [small non-state universities]

The Library

Hybrid services, E-dominant

- 2/3 of the collection is electronic [1/3 in 2019]
- 1M downloads [700K in 2019]

Integration in the University's ecosystem

- Teaching & Research
- Support for publications & data management
- Research evaluation procedures

Staff contraction - Increased costs

- 22,7 FTE + 3,9 outsourced [25,2 + 4,7 in 2019]
- Uncertain times

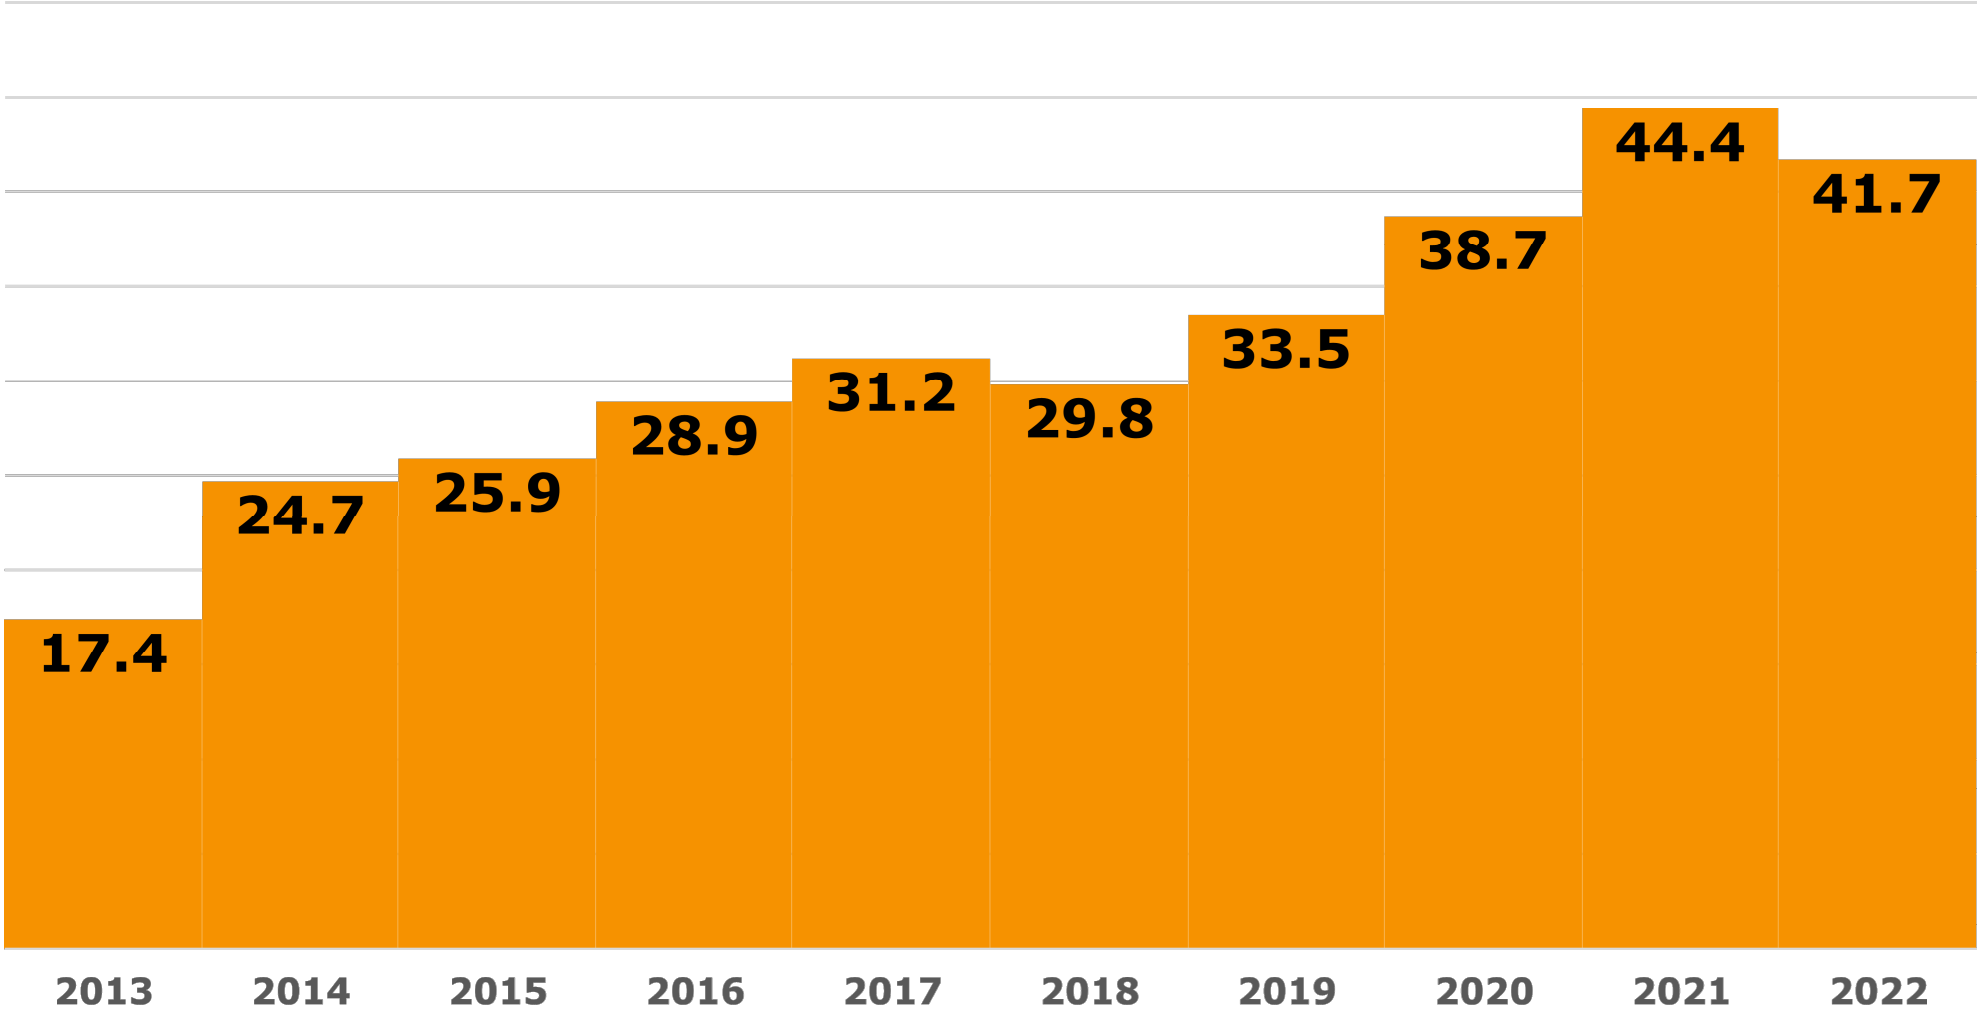
Publication-related activities

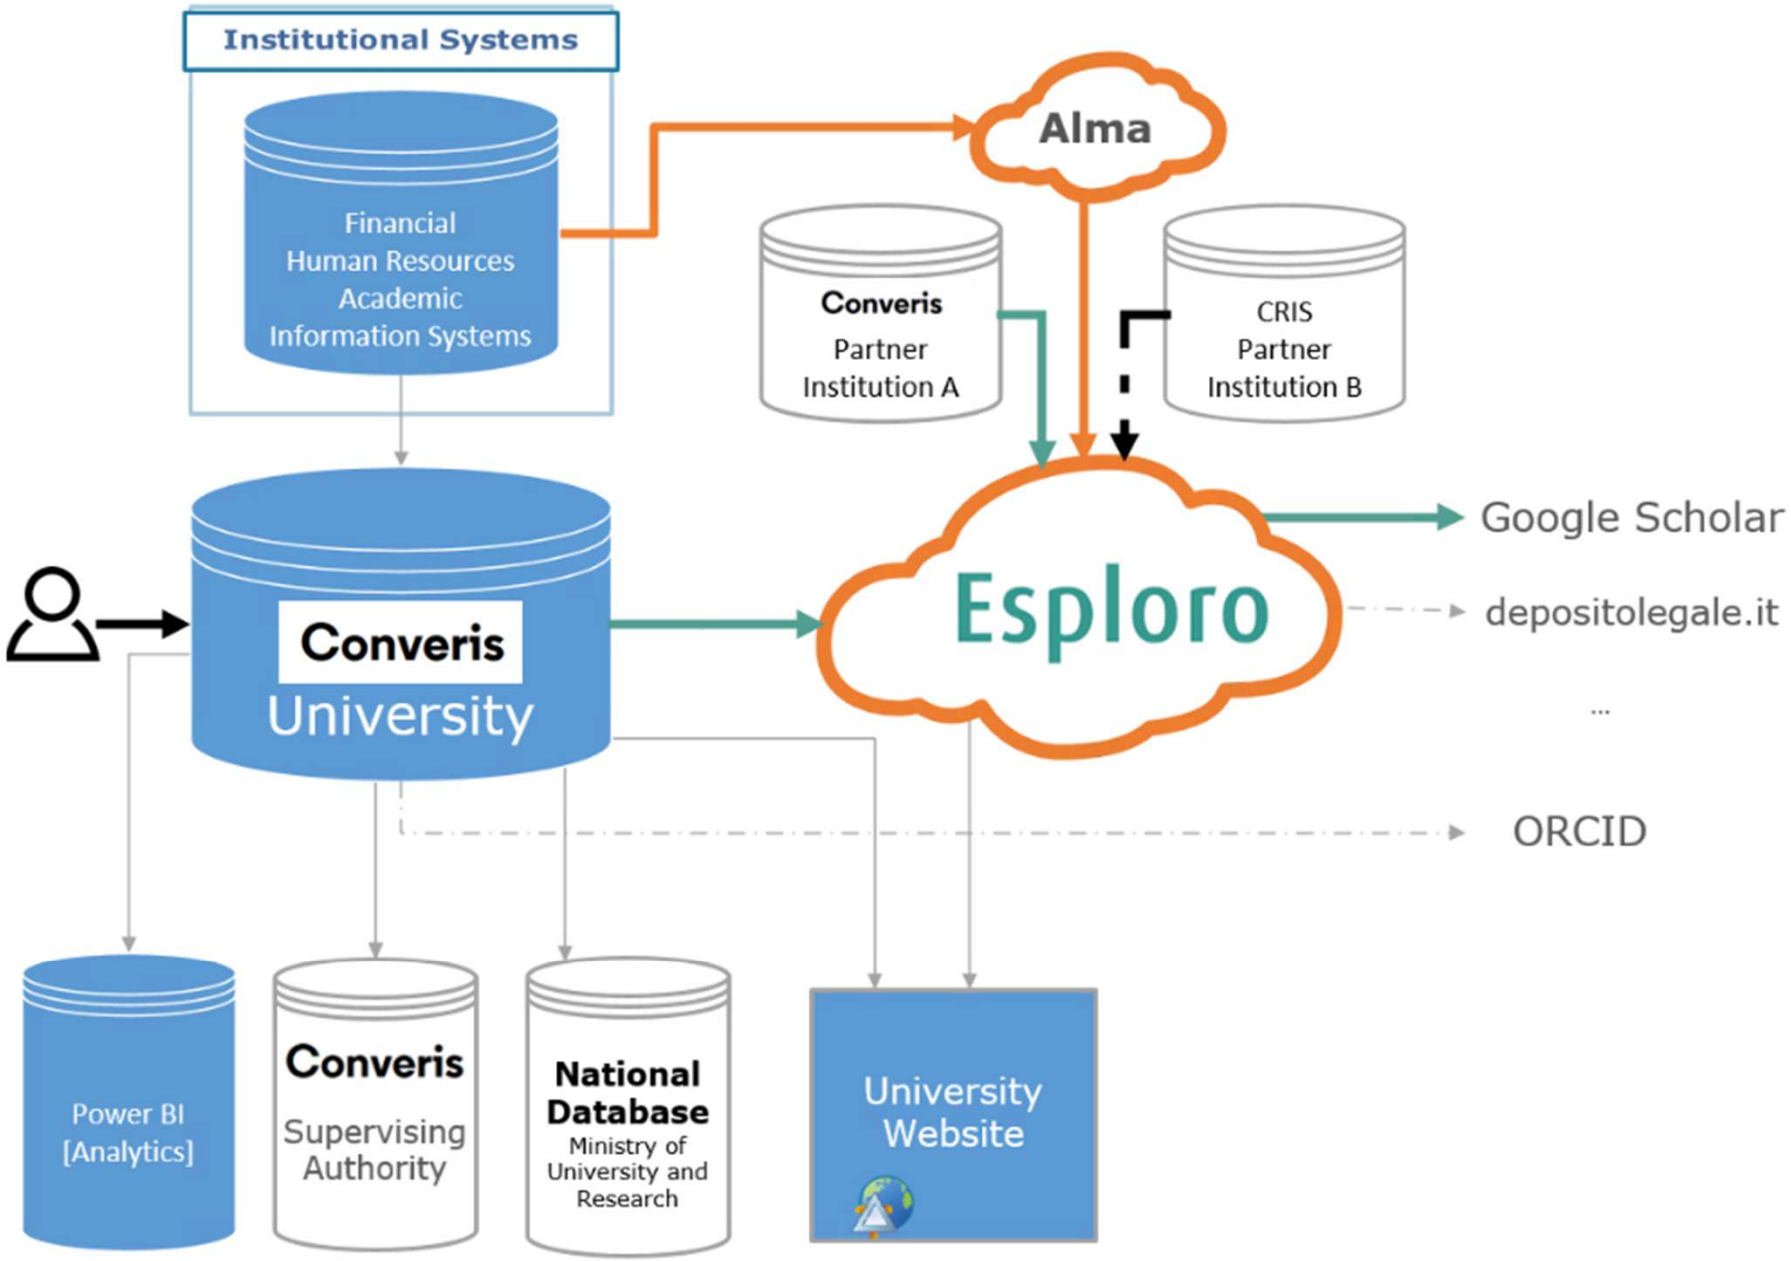
- Support in dealing with copyright, data management and dissemination issues
- Management of the RIS (projects and publications) - **Converis**
- Management of the public repository - **Esploro**
- Publication Validation – Converis and Esploro
- Support for assessment initiatives
- Theses, esp. PhD Theses

OPEN ACCESS

OA Percentage rate in Repository by year



The workflows



Publication Workflow

- Asset deposit is managed by researchers mediated by the library for validation
- Articles and books funded by the University are deposited directly by the library
- No explicit mandate for depositing assets, but evaluation initiatives use data deposited in Converis, especially for non-bibliometric disciplines

Lights and shadows

- Converis highly customizable for the research-related administrative activities
- Esploro is better for publication metadata and management
- Goal is to rely more on automatisms for data harvesting
- National requirements for deposit
- Improvements are needed

Three cases

Examples of cross-product activities:

- Article Processing Charges Management
- Articles within read & publish transformative agreements
- Data for research assessment

1) Article Processing Charges

- APCs are the fees charged to authors of scholarly articles during the publication process in open access journals
- Funded through different funds, library is responsible for the fund and/or the administrative procedure
- Data needed are author's, financial and article bibliographical metadata

Current OOTB solution in Esploro

Configuring Oable APC Integration for Open Access

An *article processing charge* (APC) is a fee charged to make a work available for open access in open-access or hybrid journals. This fee may be paid by the author, the author's institution, or their research funder.

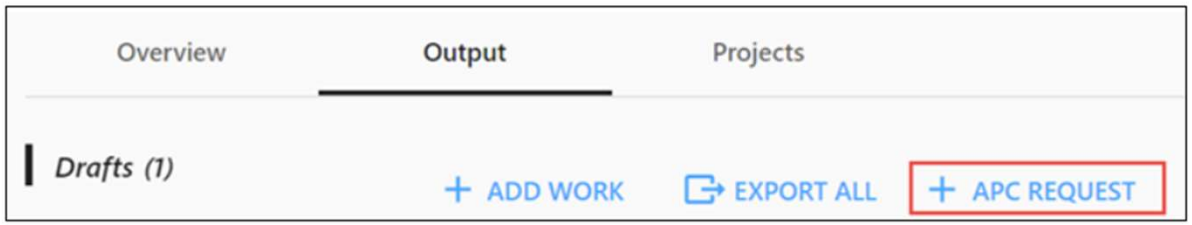
Esploro profiles include an APC form that initiates an APC request in a system called OABLE.

The integration can be configured in the OABLE Configuration. Contact Ex Libris support to configure this.

Note The APC form is enabled in Esploro only to institutions that have a license for OABLE. For these institutions, the customer parameter `esploro_oable_integration` is set to True.

You will need to supply the following:

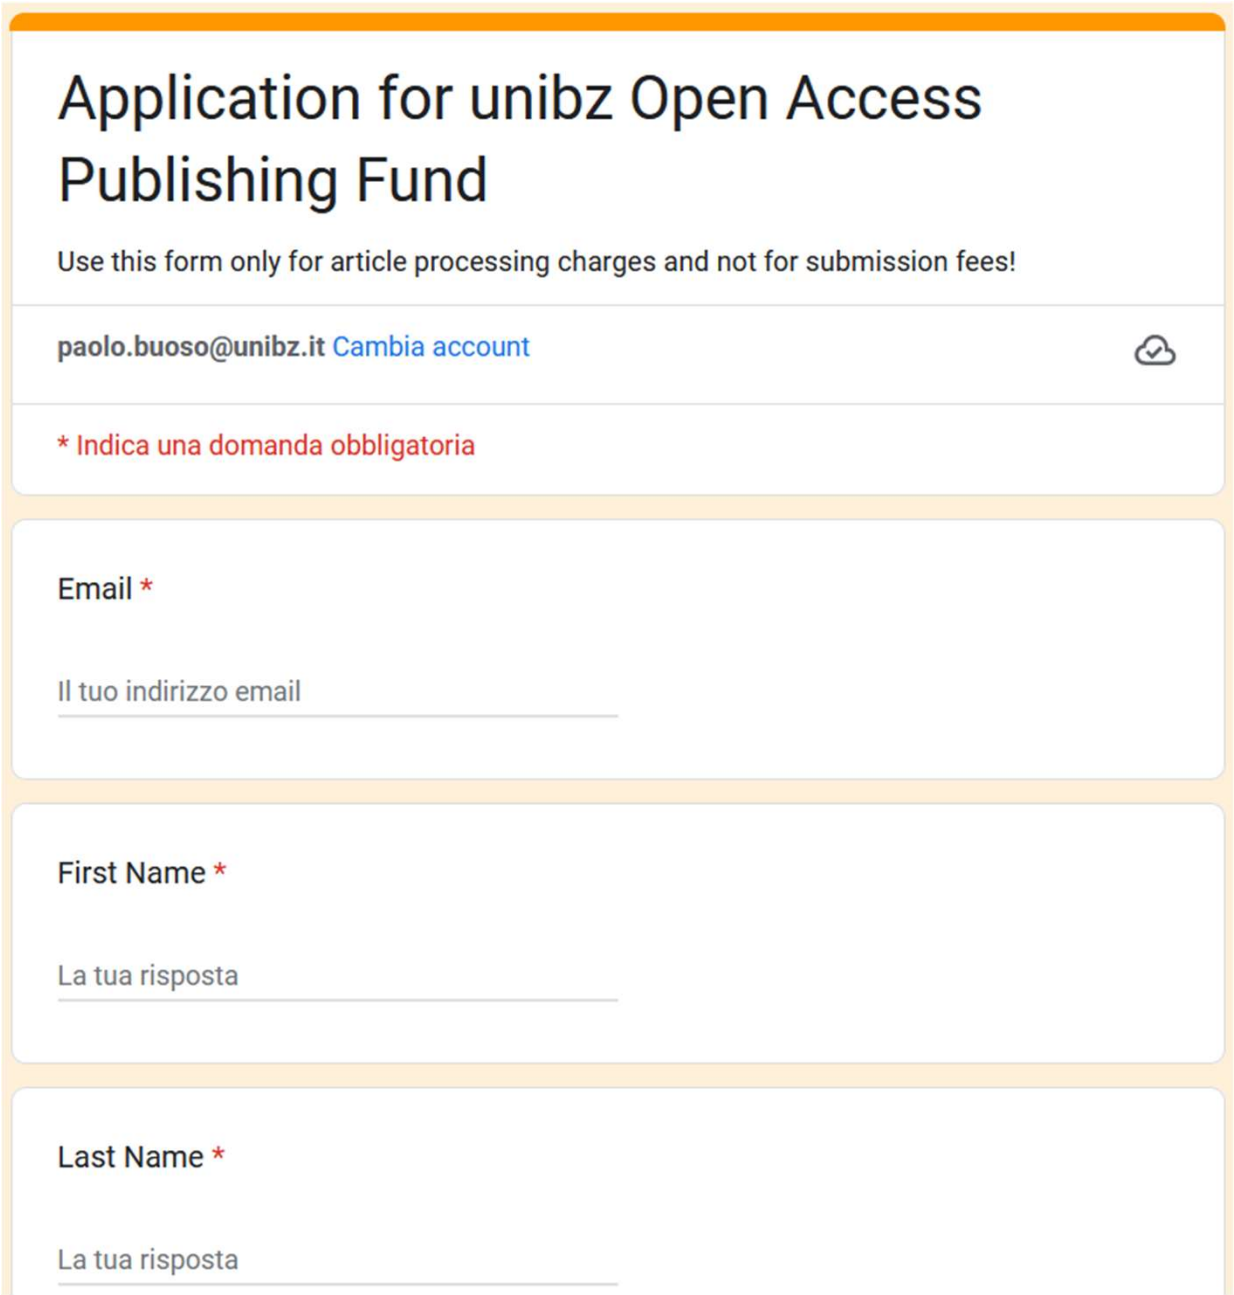
- API Key provided by OABLE.
- Institution name as it appears in ROR.
- Institution email suffix (optional).
- Whether this is for production or testing.



APC REQUEST

For a video showing how to request an APC in Esploro to make your publication open access see here.

APC: Funding request @unibz



Application for unibz Open Access Publishing Fund

Use this form only for article processing charges and not for submission fees!

2) Read & Publish Agreements

Read & Publish agreements allow libraries to purchase both content and open access publishing with one yearly fee.

Elsevier SD Freedom Collection_ SDOL 2023-2027, Elsevier ScienceDirect

CKB ID: 61115862640001241

Assigned to: -

Type: Electronic Collection - Subscription

PO line owner: Bozen-Bolzano University Library

Standard number: -

PO: UBZ-PO-27640 / (Sent)

PO line: UBZ-POL-35105 / (Recurring Renewal)

Total price: 106350.42 EUR

Funds: 03-Databases-General (100.0%) (FY-2023)

Vendor/Account: CRUI / CRUI CRUI

Vendor reference ID: -

Expected activation: 01/01/2013

License status: Active

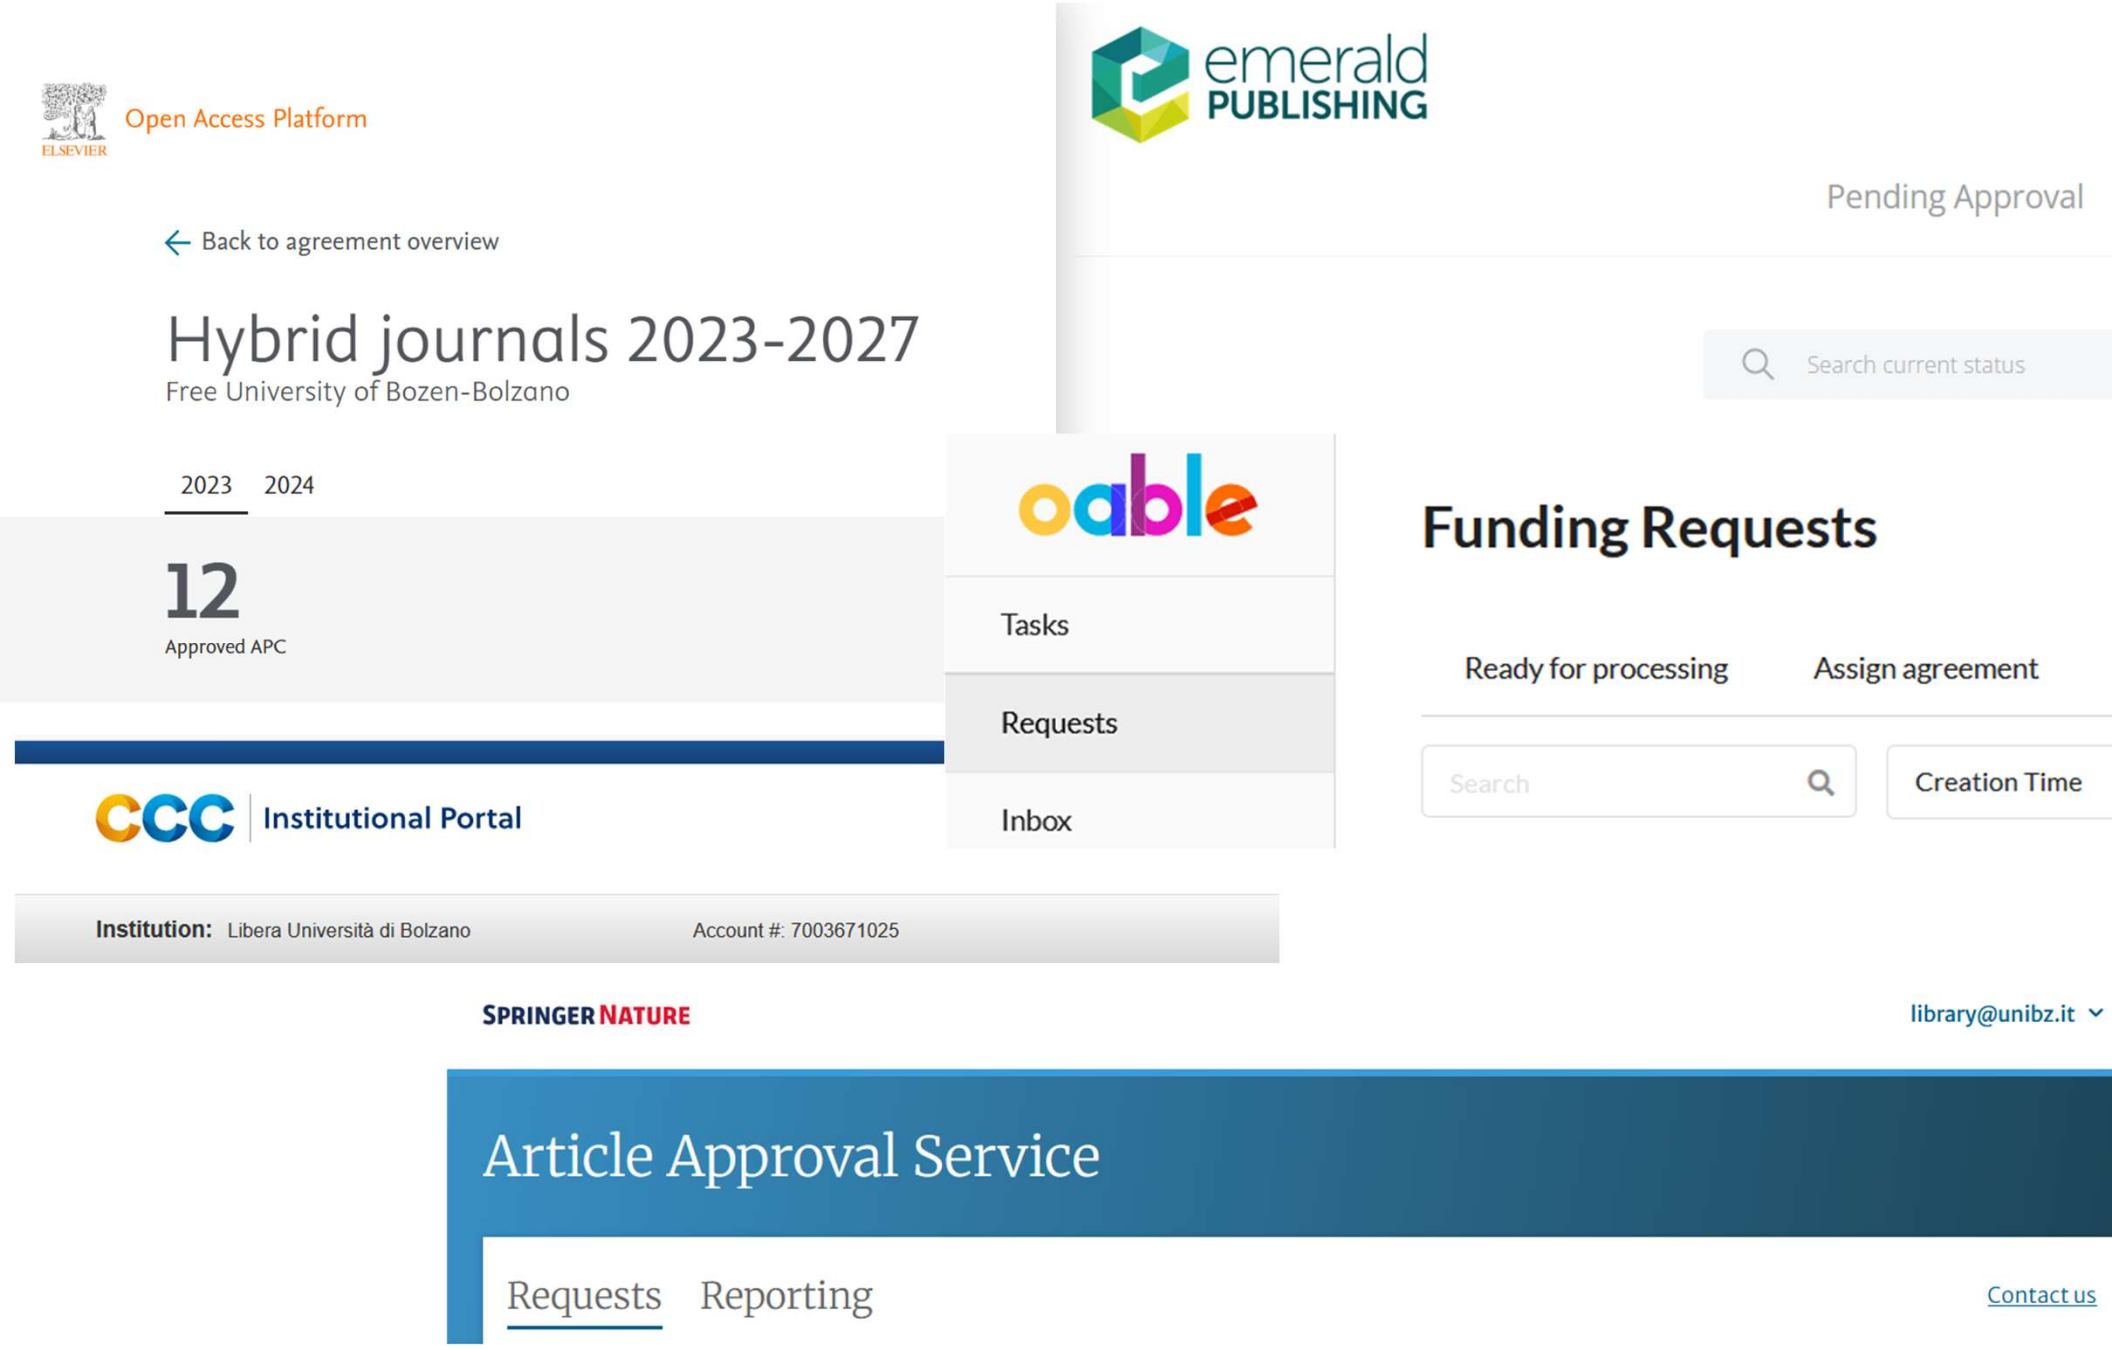
Activation status: Not Activated E-Resource

Renewal date: 30/12/2027

Sent date: 21/08/2013

Price limit reached, At least one of the reporting codes is missing

Publisher’s platforms



Open Access Articles

- Manual workflow without real integrations
- APC management isn´t integrated in Alma (Alma Road Map 2015, now in 2024)
- Missing link articles - PO in Alma/Esploro
- It isn’t possible to import data into Esploro from Alma (not like Leganto - Alma)
- Issues with Esploro as independent module (see also issues with Primo)

3) Data for research assessment

AGENZIA NAZIONALE DI VALUTAZIONE
DEL SISTEMA UNIVERSITARIO E DELLA RICERCA

Agenzia | Attività | Atti e Pubblicazioni | Comunicazione ed Eventi | Amministrazione Trasparente

Home > Attività > Classificazione delle Riviste > Classificazione delle riviste ai fini dell'Abilitazio... > Elenchi di riviste scientifiche

Elenchi di riviste scientifiche e di classe A

Si riportano di seguito gli elenchi aggiornati validi ai fini della valutazione dei candidati alle **Commissioni nazionali per il conferimento dell'Abilitazione Scientifica Nazionale alle funzioni di professore universitario di prima e seconda fascia**.

L'aggiornamento include le riviste valutate dai Gruppi di lavoro Riviste a seguito delle istanze o segnalazioni pervenute entro gennaio 2023 e approvate dal Consiglio Direttivo dell'Agenzia entro il mese di luglio 2023. Si segnala che ulteriori istanze o segnalazioni sono tuttora in corso di valutazione.

L'aggiornamento inoltre, include integrazioni di codici ISSN riferiti a riviste già classificate in precedenza.

A. Elenco delle riviste scientifiche

- Area 08 – Riviste Scientifiche (pubblicato il 22/08/2023)
- Area 10 – Riviste Scientifiche (pubblicato il 05/09/2023)
- Area 11 – Riviste Scientifiche (pubblicato il 05/09/2023)
- Area 12 – Riviste Scientifiche (pubblicato il 22/08/2023)
- Area 13 – Riviste Scientifiche (pubblicato il 22/08/2023)
- Area 14 – Riviste Scientifiche (pubblicato il 22/08/2023)

NORWEGIAN REGISTER FOR SCIENTIFIC JOURNALS, SERIES AND PUBLISHERS

3) Data for research assessment

Need for an authority record for the journal with all the essential metadata: ISSN, name variants, years, OA status, local fields in order to facilitate analysis and calls via API

ASN 2018-2020

Valore	INDICATORE	Soglia	Stato
7	Numero articoli ultimi 5 anni	4	✓
680	Numero citazioni ultimi 10 anni	157	✓
12	H index ultimi 10 anni	7	✓
La simulazione ASN per il ruolo di docente di Seconda Fascia ha esito positivo?			**SI**

Expectations

- Overcome the dualism Converis – Esploro
- Workflow revision
- New impulse after the company´s reorganisation phase
- Research outputs should be considered in the entire life cycle of the research
- Break the silos between the different solutions

Thank you!

paolo.buoso@unibz.it
