

Mini Case Studies: Using Alma Analytics and Data Visualization for Policy Refinement

Presenters:
Shelly Hypes
Brent Fortner

UNC Charlotte
Charlotte, North Carolina

About UNC Charlotte

- Charlotte, North Carolina - USA
- Enrollment approximately 30,000
- Atkins Library, Architecture Library, and Offsite Storage Facility
- Alma, Primo VE, RapidILL, Library Mobile App

Analytics and Data Visualization (DV)

- Learning as we go!
 - Not experts, but we like this work!
-

Today

- **Three Case Studies**
 - TouchNet Payment Integration
 - Equipment Audit
 - Laptop Return Rates and Fines
- **Goals**
- **Analytics/DV Reports and Results**
- **Questions and Anomalies**
- **What changed at our library as a result of this data?**

Case Study #1: TouchNet Integration

- Could we simplify a cumbersome process with varying restrictions?

Background

- Difficulties tracking online payments
- Only certain individuals permitted to accept payments
- Collaboration between the library, university eCommerce, and Ex Libris was needed

Reports

- Payment Activity Report–7 days & 30 days

Payment Activity Last 7 Days

Transaction Date	Original Amount	Transaction Amount	Fine Comment	Fine Fee Additional Transaction Id	Fine Fee Creation Date	Fine Fee Type	Payment Method
7/26/2024	50.00	50.00	Date generated: 07/22/2024, Due: 07/14/2024, Fine Policy/ies: Overdue fine policy: \$10 Daily Overdue , Action: Item was returned	13554010004091	7/22/2024 10:38:43 AM	Overdue fine	Credit/Debit Card
	18.00	18.00	Large Format Print Color; 3 Linear Feet at 18 per Linear Feet. Created by user: jowusu3	20240726000391	7/26/2024 2:29:21 PM	Tech Project	Online

Case Study #1: TouchNet Integration

- Data Visualization

Transaction Amount/Month and Year

Case Study #1: TouchNet Integration

Results

- Payments now reconciled automatically
- Changes in payment tracking and reporting

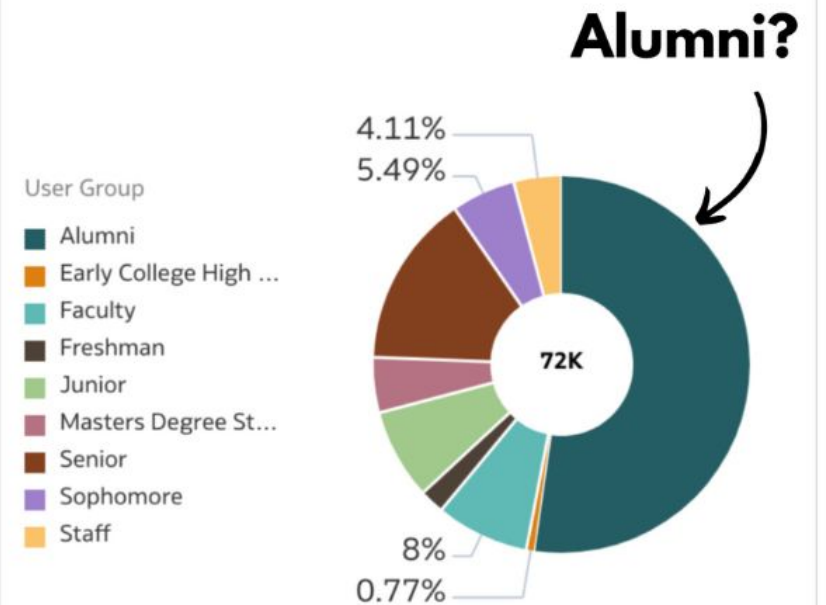

Questions & Oddities

- Alma/Touchnet information cutoff
- Alumni User Group

Strategic Decisions

- Integration is justified based on usage stats.
Continue using the TouchNet integration.
- Considering online only payments at secondary service point.

Transaction Amount by User Group

Case Study #2: Equipment Audit

- How many laptops do we actually have?
 - How many laptops are in the library at a specific time?
-

Background

- Laptops move around a lot — difficult to count.
- We had never completed an equipment audit before.

Case Study #2: Equipment Audit

Reports

- Equipment Audit Dashboard

Equipment by Location [Active Loan Details](#)

Case Study #2: Equipment Audit

Results

- Staff can quickly check for discrepancies in inventory
- Allows library staff to track down missing items faster and more efficiently
- Compliant with university audit processes and procedures

Questions & Oddities

- Analytics Lifecycle Status
- Providing accurate counts while items are on loan

Strategic Decisions

- Initial university audit led to a bi-annual library audit to ensure accuracy of collections.

Lifecycle	Indicates whether the item is active or deleted	The following are possible values: <ul style="list-style-type: none"> • Active – the item is active • Deleted – the item was deleted • None – the item has a holding record, but not an item record
-----------	-------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Case Study #3: Laptop Return Rates and Fines

- Were new overdue fine policies encouraging students to return their laptops?
-

Background

- Long term laptop loans and fine forgiveness during COVID-19 pandemic
- As library services and operations returned to normal, rate of laptop returns decreased
- Lost laptops must be billed, creating extra work for library staff
- Missing equipment hinders ability to properly serve patronbase

Some students weren't returning their laptops. →

Case Study #3: Laptop Return Rates and Fines

Results

- Students are returning their laptops on time and taking advantage of the grace period. Good news!

Questions and Oddities

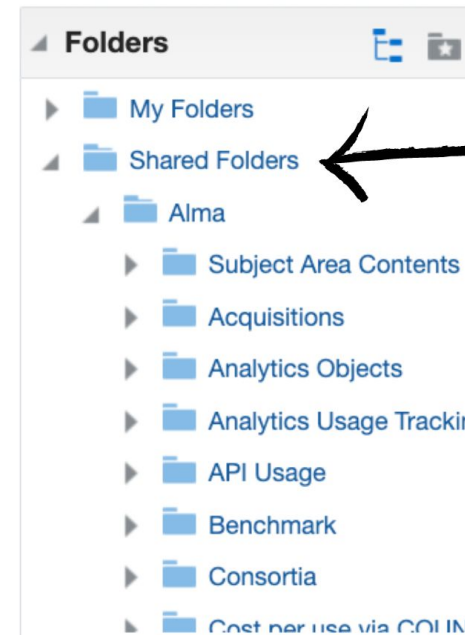

- Would a Bursar integration make this process easier?
- Students still request the semester-long laptop loan.

Strategic Decisions

- Continue enforcing laptop fines to ensure equitable access.
