

Variety vs. Uniformity: Primo VE Views within the swisscovery Network

Presentation at IGeLU 2024 Conference,
12.09.2024, Copenhagen
Fabiano Fiero, Nikol Stepan

Agenda

- 1 Introduction
- 2 The variety and uniformity within swisscovery
- 3 Bibliographic views and the example of the Recherche Patrimoniale
- 4 Potential to simplify the handling of the variety
- 5 Outlook

1. Introduction

1. Introduction

SLSP Ltd.: Service provider

SLSP network: Ca. 500 affiliated libraries in 31 Institutions with 30 Mio. records and 50 Mio. items in a multilingual environment

SLSP runs the national search platform swisscovery:

1 union view + 78 local views

Introduction

SLSP's role in the swisscovery Network:

Service provider for the libraries: Courier, Bursar, Training, 1st level support, optional services, ...

Coordination and standardization of workflows

Representing the network in different working groups and early adopter programs

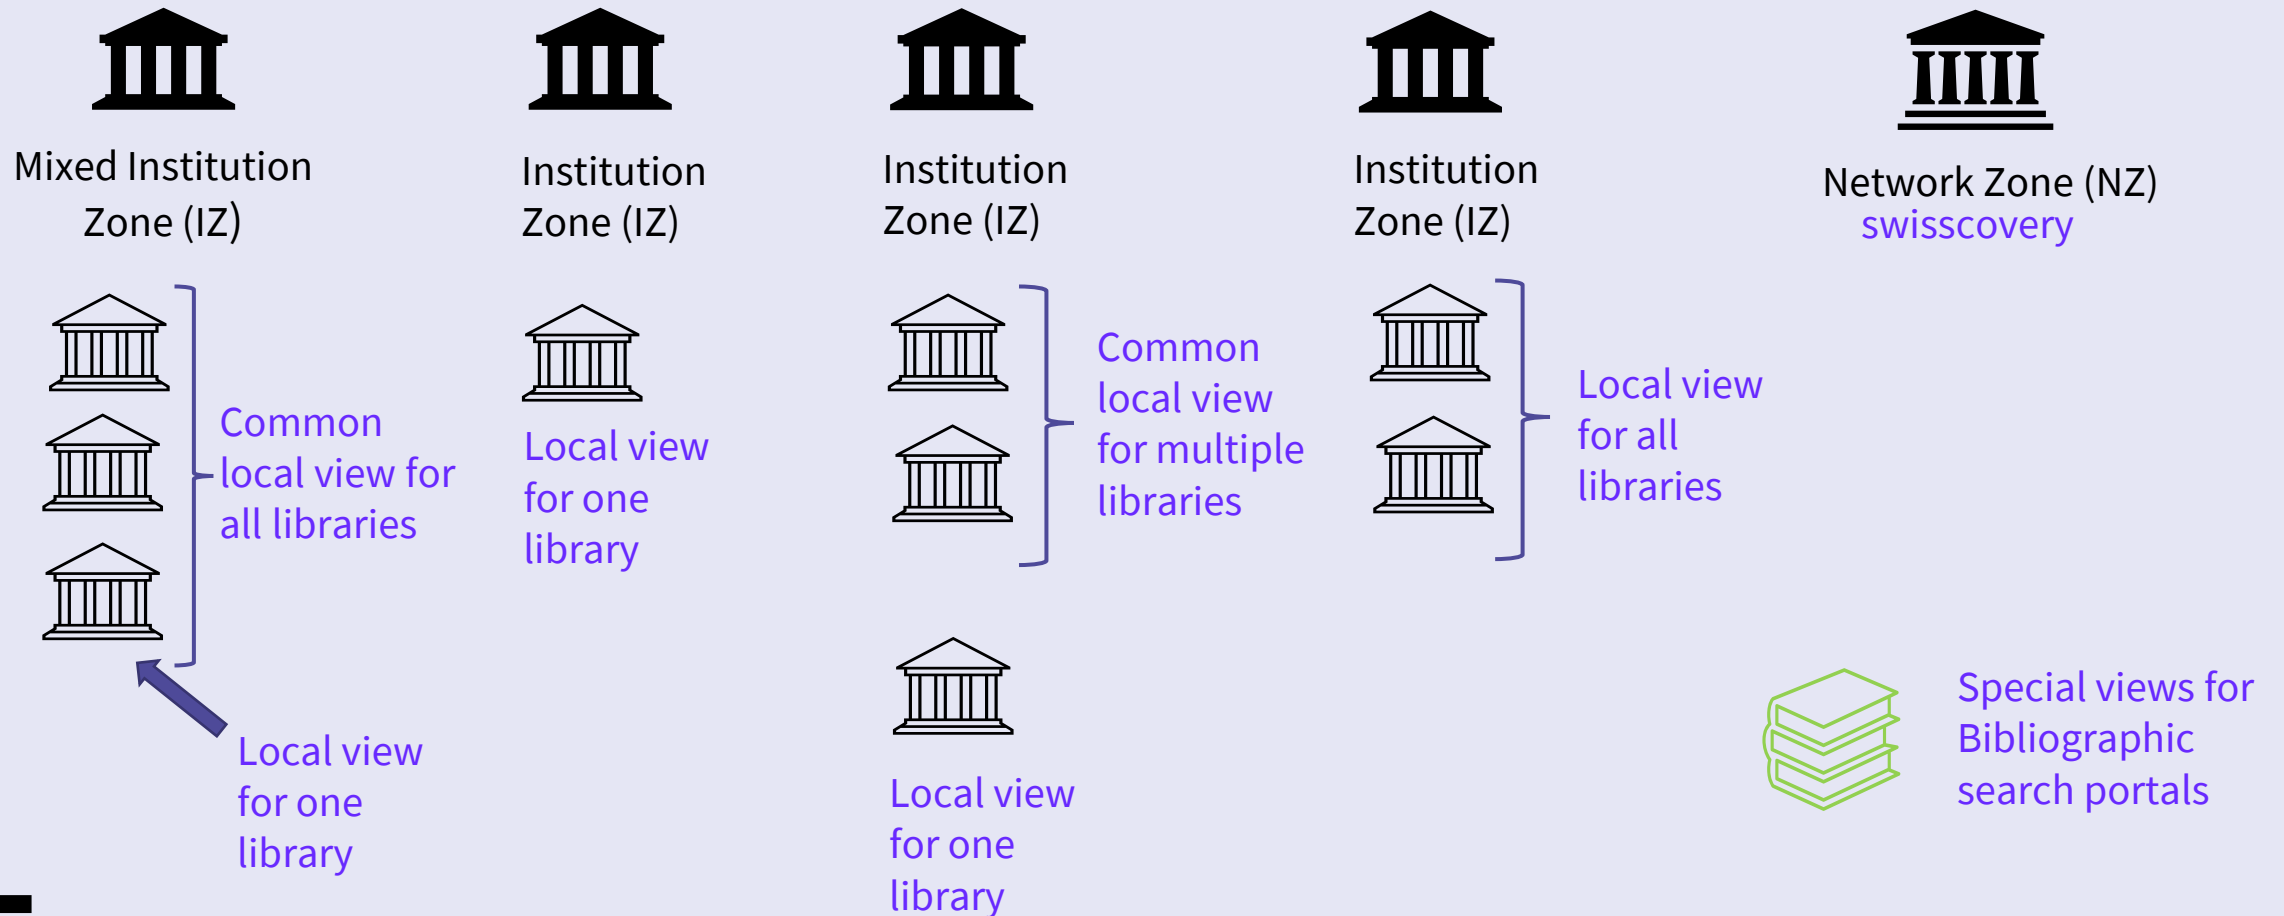

Projects: Developing new services, migrations, User Experience, ...

2. The variety and uniformity within swisscovery

2. The variety and uniformity within swisscovery

2. The variety and uniformity within swisscovery

NZ View

The NZ View interface features a search bar at the top with a microphone icon and a 'swisscovery' dropdown. Below the search bar is a navigation menu with icons for 'All', 'Books', 'Articles', 'Book chapters', 'Journals', 'Theses', and 'Films'. The main content area is divided into several sections: a 'swisscovery' header with a sub-header 'The national platform that brings together scientific information from around 500 libraries in Switzerland.' and a list of services; a video player showing a circular diagram of the swisscovery ecosystem; an 'Ask for a resource' section with a link to a guide; a 'Registration' section with a link to the registration platform; and a 'Support' section with a link to the library. A large circular graphic on the left side of the page illustrates the 'swisscovery plus' ecosystem, including 'My library', 'E-Resources', 'Physical resources', and 'Institutional repositories'.

IZ View

The IZ View interface features a search bar at the top with a microphone icon and a 'swisscovery (without CDI)' dropdown. Below the search bar is a navigation menu with icons for 'Books', 'Articles', 'Journals', 'Images', 'Films', 'Audios', and 'More'. The main content area is divided into several sections: a 'Welcome to swisscovery UB und ZB Zürich' header with a sub-header 'Here you can perform simple and advanced searches for books, e-books, journals, databases and other media.' and a list of services; a video player showing a circular diagram of the swisscovery ecosystem; an 'Order info' section with a link to information about borrowing and ordering media; a 'Registration' section with a link to the registration platform; and a 'Questions, comments and support' section with a link to contact us. A large circular graphic on the left side of the page illustrates the 'swisscovery plus' ecosystem, including 'My library', 'E-Resources', 'Physical resources', and 'Institutional repositories'.

The Reperio interface features a search bar at the top with a microphone icon and a 'Univerità della Svizzera italiana' dropdown. The main content area is divided into several sections: a 'Welcome to Reperio' header with a sub-header 'The USI search portal inside swisscovery'; a list of benefits from Reperio, including access to collections of over 490 scientific libraries, use of electronic resources, document requests, and advanced management; a 'Registration' section with a link to the registration platform; and a 'Reperio is organized in several research scopes. You can search in in:' section.

2. The variety and uniformity within swisscovery

SLSP approach and standard for the Primo views

Basic service vs Optional service

few configurable elements vs few mandatory configurations

- Standard definition
 - > Master Template
- Coordination efforts
 - > Local fields and External data sources

3. Services

SLSP, as basic service, maintains and improves the Display and Local fields and the related Normalization rules listed below. Changes on these fields are communicated via blogpost. SLSP updates these fields for all SLSP-coordinated IZs. Self-coordinated IZs must adapt all Display fields and the Local fields from 1 to 50 by themselves. Updates for the Local fields from 51 to 100 are distributed from the NZ.

The current version of the Normalization rules can be consulted here: <https://github.com/Swiss-Library-Service-Platform/Primo-VE-Normalization-Rules>

Display fields

addtitle, contents, contributor, coverage, creationdate, creator, dissertation, edition, format, frequency, genre, identifier, ispartof, language, publisher, relation, rights, series, subject, title and unititle.

Local fields

Field	Name	Comments
Local 01	General index	Enabled for search
Local 02	System number (035)	Search & facet
Local 03	Display in the GND	Search & facet
Local 09	General index – External Data Sources	Enabled for search
Local 10	Availability and Location	

2. The variety and uniformity within swisscovery

SLSP approach and standard for the Primo views

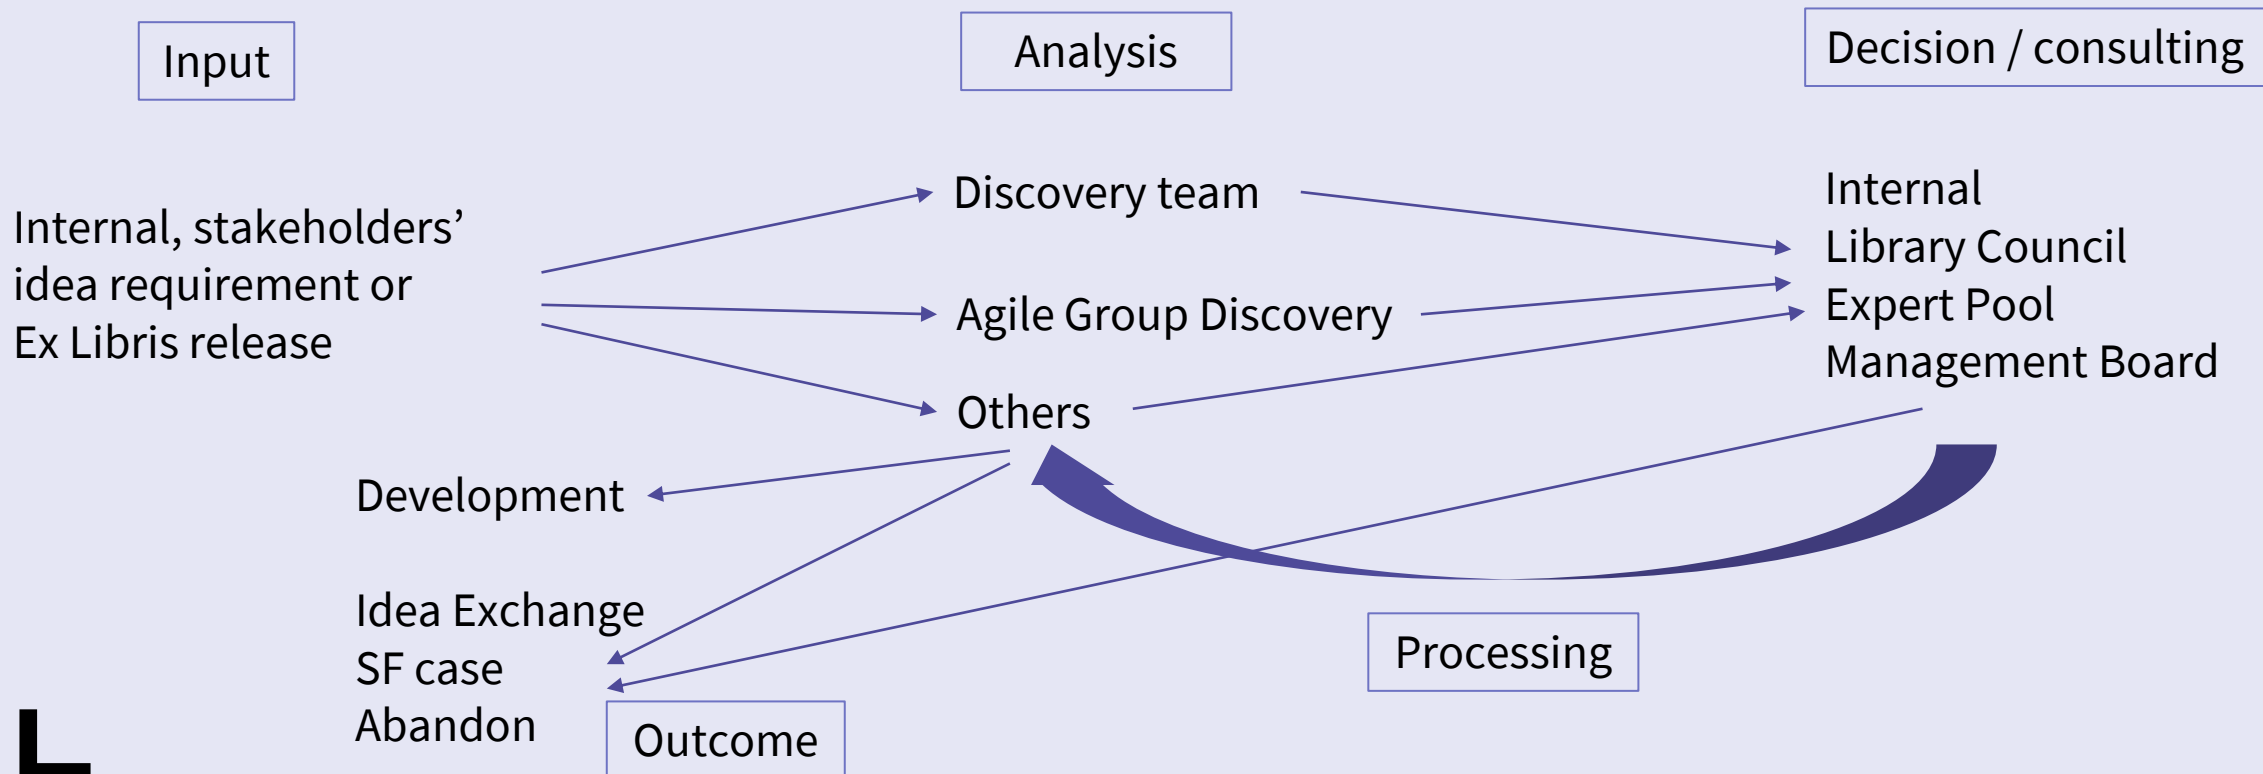

- Variety and uniformity management
 - > Configuration and customization possibilities

2. The variety and uniformity within swisscovery

SLSP change process

2. The variety and uniformity within swisscovery

Challenges:

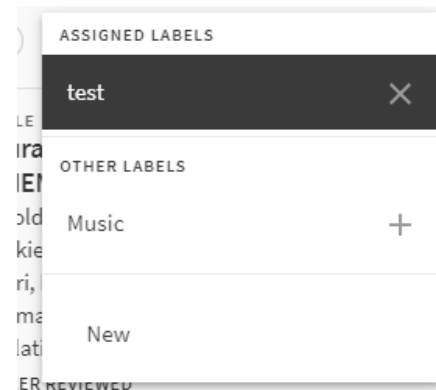

- IZs' freedom vs common standard
- Libraries specificities
- Communication
- Planning and developments

February 7th- March 6th/8th	Customization	Production	swisscovery	Sprint 2/24
March 6th/8th	Configuration and customization	Sandbox	swisscovery, central customization package and local views	Sprints 9/23-1-2/24

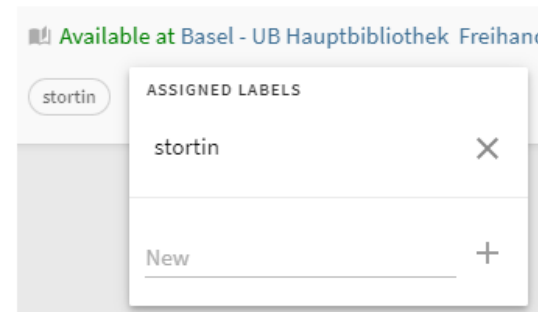

Favorites: design improvement

The design of the labels pop-up box has been improved. A plus has been added to make more visible how to enter a new term also, a problem of mouse overing has been solved.

Before

After

The js directive `prm-favorites-edit-labels-menu-after` and the css section `/940 Favorites/` (line 3590) have been added, the css section `01 Primary colour → background of the primary color` (line 3752) has been updated.

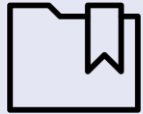

3. Bibliographic views and the example of the Recherche Patrimoniale

3. Bibliographic views

SLSP

Bibliographies

Purpose

- Views offering bibliographical references only, while regular swisscovery views are focusing on delivery services
- Display window for collections focused on specific topics or geographical areas
- More flexibility without competing with local views

3. Bibliographic views

Regional

Bibliographie fribourgeoise

by Bibliothèque Cantonale et Universitaire de Fribourg

The screenshot shows the homepage of the 'Bibliographie fribourgeoise' website. At the top, there is a navigation bar with the logo 'Bibliographie' and links for 'Nouvelle recherche', 'Site web BCU', and 'S'identifier / S'inscrire'. A search bar is prominently displayed with the text 'Rechercher' and a 'Recherche avancée' button. Below the search bar, the title 'Bibliographie fribourgeoise' is followed by a descriptive paragraph: 'La Bibliographie fribourgeoise répertorie les documents imprimés et audiovisuels à thématique fribourgeoise, ainsi que les publications littéraires, musicales et artistiques d'auteur·e·s fribourgeois. Extraite de [Discovery Fribourg-Freiburg](#) et quotidiennement mise à jour, elle contient quelque 50'000 références. Un plan de classement complète les possibilités de recherche habituelles.' Below this, there is a section for 'Liste des périodiques dépouillés annuellement' and a 'Plan de classement' menu with categories: 0 Généralités, 1 Sciences - Géographie - Environnement, 2 Histoire, 3 Politique - Droit - Etat, and 4 Démographie - Société - Bilinguisme - Santé - Sport.

National

recherche-patrimoniales.ch

by SLSP and Swiss National Library

The screenshot shows the homepage of 'Recherche Patrimoniales'. The header includes the logo 'Recherche Patrimoniales' and navigation links for 'Neue Suche', 'Indessuche', 'swisscovery', and 'Helvetica'. A search bar is at the top with the text 'Suchen' and an 'Erweiterte Suche' button. The main content area features the title 'Recherche Patrimoniales' and a welcome message: 'Willkommen bei der gemeinsamen Rechercheplattform der swisscovery-Bibliotheken und der Schweizerischen Nationalbibliothek (NB). swisscovery ist die nationale Plattform, welche wissenschaftliche Informationen aus rund 500 Bibliotheken der Schweiz zusammenführt. Helvetica ist der Online-Katalog der Schweizerischen Nationalbibliothek (NB), der Bibliothek für Helvetica. Definition von Helvetica.' Below this is a section titled 'Titel in Helvetica' displaying a carousel of book covers. At the bottom, there is contact information for 'SLSP AG' and 'Schweizerische Nationalbibliothek'.

International

Thomas Mann International

by ETH Zurich

The screenshot shows the homepage of 'THOMAS MANN INTERNATIONAL'. The header features the logo 'THOMAS MANN INTERNATIONAL' and navigation links for 'New Search' and 'Network Website'. A search bar is at the top with the text 'Search' and an 'ADVANCED SEARCH' button. Below the search bar, there is a section titled 'What is "Thomas Mann International"' with a sub-heading 'Thomas Mann International' and a paragraph: '"Thomas Mann International" is the network of five "Mann houses", which preserve the life stations of the Nobel Prize winner Thomas Mann:'. This is followed by a bulleted list of partner institutions: Buddenbrook House / Heinrich-and-Thomas-Mann-Center (Lübeck), Monacensia im Hildebrandhaus (Munich), Thomas-Mann-Archive of the ETH Zürich (Zurich/Switzerland), Thomas Mann House (Pacific Palisades/USA, Villa Aurora & Thomas Mann House e.V.), and Thomo Manno kultūros centras/Thomas-Mann-Kulturzentrum (Nida/Litauen). Below the list is a 'Contact the Network «Thomas Mann International»' link. At the bottom, there is a section titled 'One search – lots of resources' with a paragraph: 'The research portal «TMI Research» of the Network «Thomas Mann International» gives you access to the archives of the following partners: Buddenbrook House / Heinrich und Thomas Mann Center in Lübeck, Monacensia im Hildebrandhaus in Munich, Thomas Mann Archives of the ETH in Zurich and Thomas Mann House in Los Angeles. The network grants you access to the following resources:' followed by a bulleted list: 'Holdings of the special library on the Mann family with numerous books, essays and newspaper'.

3. Bibliographic views

Recherche Patrimoniales

- Display window showcasing searchable holdings of the swisscovery libraries and the Swiss National Library
- Result of collaboration between SLSP and Swiss National Library in 2023
- Feasibility study for merging titles from different Alma environments

The top screenshot shows the homepage of Recherche Patrimoniales. It features a search bar at the top with a microphone icon and an 'Advanced Search' button. Below the search bar, the title 'Recherche Patrimoniales' is displayed. A welcome message follows, stating: 'Welcome to the joint research platform of the swisscovery libraries and the Swiss National Library (NL). swisscovery is the national platform that brings together scientific information from around 500 libraries in Switzerland. Helveticat is the online catalogue (OPAC) of the Swiss National Library (NL), the specialist library for Helvetica. Definition of Helvetica.' Below this, a section titled 'Titles in Helveticat' displays a carousel of book covers, including 'LE MONT-RIGHL' and 'Chocolat, in Borne-Methold'. At the bottom, contact information for SLSP AG and the Swiss National Library is provided.

The bottom screenshot shows search results for 'chocolat'. The search bar contains 'chocolat' and the results are sorted by 'Relevance'. The results are filtered by 'Available in libraries', 'Online', and 'swisscovery Network'. The results list several versions of 'Chocolat' books, including 'Monsieur Chocolat' by Noiriél, Gérard (1950) and 'Chocolat' by Paris: Flammarion (2007). The results also show 'Data Source' and 'Resource Type' filters, and a list of authors and their works.

3. Bibliographic views

Settings:

- Data from Swiss National Library harvested via OAI-PMH into Primo of SLSP Network Zone
- Flexible configurations on view level
- Restriction: Displaying only link to the regular search portals swisscovery and Helveticat

Request

3. Bibliographic views

Challenges

- Organizational: Special needs and level of knowledge about the system depending on library or group of libraries to be part of such view
 - ➔ Good onboarding process and requirements elicitation needed
- Technical: More external data needs to be excluded from regular searches

4. Potential to simplify the handling of the variety

4. Potential to simplify the handling of the variety

Internal:

- Simplify standard
- Review our process

External:

- Consortial configurations -> ongoing by Ex Libris!
- Better separation of inventory for the search in Primo VE (external data sources, digital objects in Alma)

5. Outlook

5. Outlook

- More projects like for special views for libraries (part of network and outside) and other potential partners
- Handle the challenges of our view's topology and configuration possibilities for consortia
- New Discovery Experience: An opportunity to re-think processes and approaches
