Libraries Connecting Students With the Content They Need

Can we support our courses with existing resources?

Can we borrow the titles our users need?

What is our budget for this title?

Which format - print or electronic?

Is the requested book also on a reading list?

How many students require the book?

Do we have access to this title in a DDA or EBA?

What license model should we buy?

Can this book fulfill multiple needs?

Which publishers and aggregators offer this title?

Have other librarians received this request from another source?

Where can I find the most affordable option?

Many questions and steps are involved before acquiring a single resource

It's a lot for the library to manage
