

François Renaville's Candidacy for the IGeLU Steering Committee (2026–2027)

I have been working at the University of Liège Library (Belgium) for more than 25 years and currently serve as Head of Library Systems. We have been using Clarivate library solutions since 2006. Our library currently uses Alma, Primo NDE, Alma Specto, Rialto, Library Mobile, and RapidILL.

For several years now, I have been supporting the IGeLU SC in organising the programme of the annual conference. I have also had the opportunity to coordinate the SFX Knowledge Base Advisory Board (KBAB) and the Content Working Group (CWG) for IGeLU. For three years, I served as the IGeLU SC liaison for the Content Working Group, and since autumn 2025, I have been the IGeLU SC liaison for the Documentation Advisory Board.

Among other things, I would make it a priority as a member of the SC to contribute to ensuring that Clarivate products deliver high-quality, reliable services that meet the needs of libraries and their users. I would also be keen to continue supporting the organisation of IGeLU conferences and contributing to the community wherever my experience and expertise can be useful.
