Questions & Answers

1. "Is the development of software components for Aleph to allow publication of Bib and Authority Data in LOD (Linked Open Data) in the plans of the Company?
"

Questions & Answers

2. For how long can we expect lively development and new versions being released in Aleph?

Questions & Answers

3. Aleph and/or Alma : As admin tasks create a bottleneck situation we're looking at alternative workflows that would enable us to "outsource" recurring service requests such as password resets so that our systems librarian can focus on incident management instead. How will change management and service management processes be supported by future version of the library management system?

Questions & Answers

4. "Is the development of software components for Aleph to allow publication of Bib and Authority Data in LOD (Linked Open Data) in the plans of the Company?"
